

King of
Building Automation

DIVUS CIRCLE

The Innovative Intercom

DESIGN PLUS
powered by: **light+building**

The innovative features and outstanding design of DIVUS CIRCLE are upgrading the traditional intercom to an intelligent and essential device for the smart home, giving the entrance an unprecedented, appealing look.

It is your personal bodyguard, wall light and intercom all-in-one, and will thus increase safety and comfort. It monitors the approaching

guest and, according to the time of day and a pre-defined scenario, regards him with a warm smile or a skeptical look.

The user interface is intuitive and can be configured depending on individual taste.

CIRCLE is applicable to single-family homes, apartment buildings, offices and complex towers.

DIVUS TOUCHZONE

The Synergy Touch

DISPLAY 17,8 CM (7") - 25,7 CM (10") - 39,6 CM (15") - 47 CM (19")

The touch panel combines the functions of a smartphone with building security functions. It is the product innovation for more comfort and security in every smart building!

A touch panel for your visions! DIVUS TOUCHZONE can be designed individually, where all your ideas and visions can be implemented with

Android. DIVUS provides reliable and practical apps for room control and intercoms, which are pre-integrated into the panel.

The elegant and restrained design of the DIVUS TOUCHZONE is anything but obtrusive, a characteristic that surely endears the device to the hearts of architects and interior designers.
