

WIBE CABLE LADDERS

CATALOGUE 2022

The spine of an exceptional infrastructure

Creating clever, uplifting
solutions, together with our
clients for almost 100 years.
Reimagined in June 2021
– for the coming century.

Looking ahead to the next century, we are reinventing ourselves – as Wibe Group – bringing together four of the world's leading cable management brands as a new independent company to offer a complete, innovative range of cable ladders, cable trays and mesh trays – for applications ranging from commercial buildings to extreme demanding industrial environments.

Wibe Group factory in Mora, Sweden.

The spine of an exceptional infrastructure

The cable support system is as essential for the building's infrastructure as the bone structure for the body. The Wibe Cable Ladders are robust and functional, enabling the same ladder to be used both horizontally and vertically. Add to that the extensive range of accessories as well as the wide variety of surface treatments – and you will have a safe and easily maintained solution that can be mounted in any direction or angle to fit round bends and curves in any environment.

Light, strong and endurable

A product with the right properties fit for purpose will meet the high demands on performance, reliability and cost-efficiency. That is why a thorough analysis of the environment in terms of corrosion, pollution, humidity and salt is crucial before deciding on material and surface treatment. Whether you need a ladder for sheltered, dry indoor applications or the harshest offshore environments, we will find the solution for you. Just take a look at our offer.

Wibe KHZ

Cable ladder with round rungs

Length: 6 m.
Width: 150 - 600 mm
Corrosion class: C3 to C5-I
Surface treatment: Hot-dip galvanized, Zinkpox®

Wibe KHZV

Reinforced cable ladder with round rungs

Length: 6 m.
Width: 200-600 mm
Corrosion class: C3 to C5-I
Surface treatment: Hot-dip galvanized, Zinkpox®

Wibe covers all corrosion classes

C1

Electro-galvanized

For heated facilities with low exposure to corrosion, such as hotels and offices.

C2

Pre-galvanized

For partly outdoor environments with low exposure to corrosion, for example warehouses and parking garages.

C3

Hot-dip galvanized

For urban and light industrial areas with average environmental corrosion, such as breweries and dairies.

C4

Hot-dip galvanized

For areas with high levels of environmental corrosion, humidity and airborne pollution such as industrial and coastal areas, chemical plants, dockyards.

C5-I

Stainless steel AISI 304, Zinkpox®, For areas with almost permanent high levels of humidity and airborne pollution, such as chemical and heavy industries, tunnels and dockyards.

C5-M

Stainless steel AISI 316L, For areas with almost permanent high levels of humidity, airborne pollution and salt, such as purifying plants and offshore.

For more information regarding surface treatments and corrosion classes, please see from page 104

Wibe KHZSP / KHZSPZ+

Cable ladder with open profile and perforated rungs

KHZSP

Length: 3, 4 and 6 m. Width: 200-600 mm

Corrosion class: C2 to C5-M

Surface treatment: Pre-galvanized, Stainless steel AISI 316L

KHZSPZ+

Length: 4 and 6 m. Width: 200-600 mm

Corrosion class: C3 to C4

Surface treatment: Zink+

Wibe KHZP / KHZPS

Cable ladder with perforated rungs

KHZPS

Length: 6 m. Width: 150-1000 mm

Corrosion class: C2

Surface treatment: Pre-galvanized

KHZP

Length: 3 and 6 m. Width: 150-1000 mm

Corrosion class: C3 to C5-M

Surface treatment: Hot-dip galvanized, Zinkpox®, Stainless steel AISI 316L

Wibe KHZPV

Reinforced cable ladder with perforated rungs

Length: 6 m.

Width: 200-1000 mm

Corrosion class: C3 to C5-M

Surface treatment: Hot-dip galvanized, Zinkpox®, Stainless steel AISI 316L

Wibe KHZP 20C

High-sided reinforced cable ladder with perforated rungs

Length: 6 m.

Width: 200-1000 mm

Corrosion class: C3 to C4, C5-I Zinkpox® on special order

Surface treatment: Hot-dip galvanized, Zinkpox® on special order

P135698

P135700

P135702

P135273

P135711

P133788

Support bracket

Sturdy support bracket for centre support of cable ladders on pendant/fixing rails and vertical pieces.

P135711

Installation plate

Mounted on vertical cable ladders and used for terminal boxes, contact breakers etc.

P133787

Coupling 22

Versatile joint for horizontal or vertical branches in any angle. Suitable for 90° bend, T- or X-junctions, or as a riser.

P135711

Vertical piece

Multipurpose support, either used from the ceiling or from the floor. Ready for either cantilever arms or support brackets.

Organised and ready for constant change

In a high-tech industry the infrastructure needs to be modular and flexible, minimizing the risk of costly downtime when shifting to a new design or model. This is why the Wibe Cable Ladder system must be agile enough to be completely reconfigured in a matter of days.

An advanced industrial environment can really put a strain on the power and network infrastructure. For Wibe cable ladders, there is no application too complicated. Our cable ladder offer includes a wide range

of dimensions and accessories like bends, raisers, cantilever arms, brackets, joints, couplings and much more, making the entire solution flexible and adjustable enough to take on any challenging task.

P135725

The challenge

A typical urban environment. Thousands of people commuting every day. It is busy and crowded. Departures and arrivals on time are vital and what everybody expects. And there is no room for an inadequate infrastructure.

A smart feature is the drainage holes placed at the top and bottom of the open profiles of the KHZSP stainless steel ladder, preventing moisture from filling up.

P135725

P135758

The solution

This installation includes only a few parts:

1. KHZSP Cable ladder in stainless steel
2. Round bar fixing for ceiling
3. Support bracket
4. Coupling
5. Angle plate
6. Joint

On track with the future

Today we constantly meet increasing expectations on performance, flexibility and sustainability. Advanced constructions require top quality in every detail and keeping up with technical development is a challenging task. Our goal is to prosper business performance while conserving environmental resources.

The monorail train illustrates a modern, technological city infrastructure, but the idea of an elevated train on a single track actually dates back to the beginning of the 20th century.

Today the monorail trains are often used as fast intercity connections, running through tunnels and open landscapes, exposed to rain, ice and snow – at a speed often

exceeding 300 km/h.

Yet the journey is smooth, comfortable and quiet. Accentuating demands on capacity and comfort have spurred the development of advanced technique and sophisticated design. With the comprehensive offer that is constantly refined and improved, Wibe Cable Ladders match all the requirements by far.

P135703

The challenge

Heavy industrial environment with a lot of pollution. Uptime is crucial, no room for costly production shutdowns.

The solution

These are the only parts needed:

1. KHZ Cable ladder in hot-dip galv
2. Riser 18
3. Joint 21
4. Cover plate
5. T-junction 16
6. Vertical piece 20FS, Cantilever arm 50, End cap

P65720

Breaking ground for heavy-duty applications

No environment is too tough or too dirty. With the appropriate material and ideal surface treatment of the cable support solutions, reliable power and network supply is secured.

It is noisy, busy and very harsh conditions. Maintaining continuous production is top priority, and any malfunctions will jeopardize both safety of the staff and the all important profitability. Here the cable support solution is really put to the test. The standing vertical

pieces can carry several layers of ladders on top of each other, securing easy maintenance and service. Details like round rungs and cover plates protect the installation from dirt and damage.

The challenge

An environment like a huge sports arena calls for extra strong solutions – both in terms of safety and easy maintenance in odd spaces.

Few but strong

The installation above is assembled with a limited number of parts:

1. KHZPV Cable ladder in hot-dip galv
2. T-junction 56
3. Take-off hook 47
4. Vertical piece 20F Cantilever arm 50F
5. End cap
6. Profile protection

Safety and dependable operation in focus

Tens of thousands of people, roaring, cheering, all eyes on the game. High above is the headlight system, sustained by an extensive infrastructure of cable support solutions. Downright performance is what everybody expects. And what they can count on.

If the task is to support error-free, reliable lighting for the field and the audience, along with power and network supply for broadcasting, only the strongest is good enough. Wibe reinforced ladder KHZPV has an impressive distribution load of 150 kg/m (at 4 m support distance), backed up

by sturdy vertical pieces, cantilever arms, junctions etc. Another good feature is the profile protection, allowing safe tap-offs with secured maximum bend radius anywhere on the ladder. Equipped with a label, the profile protection can also be used for clear marking and identification.

Accessories and benefits

Screwless joint

When joining two ladders the screwless joint is very handy. Just snap it in place. The joint is suitable for fitting of 90° bends, T- and X-junctions and vertical mounting. No extra earthing is necessary.

Coupling 22

This ingenious coupling allows mounting of horizontal or vertical branches at any desired angle. It can be used for 90° bends, T-junctions, X-junctions, or as a riser.

In the section Use and installation in this catalogue you will find a lot of installation examples.

Take-off hooks

Convenient hooks for use on ladders to make 90° branches. Just hook on and take off at any place on the ladder. Equipped with an extra hole for earthing or when vertical locking of the ladder is needed.

T-bolt 26U

This clever bolt has a metal spring which allows it to remain anywhere in the fixing rail before it is even fixed. Just apply the T-bolt in the desired position, adjust it if necessary and then fix it in place by tightening the nut.

Junction box plates

The multi-purpose junction box plate 35S can be mounted in standing or hanging positions on the side sections of the cable ladder. The pre-defined hole pattern fits both LexCom and Actassi connectors. The junction box plate 35P is intended to be mounted between the rungs of the cable ladder.

Tele-conduit

Keep the entire installation tidy and well organized – the tele-conduit enables the ladder to carry both power cables and network cables.

Support

The different supports like vertical pieces, fixing rails, cantilever arms and brackets are delivered in numerous sizes, offering swift flexibility as well as strength and organizational qualities to any complex installation.

Cable roller

The cable rollers simplify pulling of cables. The rollers are adjustable in height to allow cables to pass underneath. Suitable for 90° bends, T- and X-junctions as well as risers.

The challenge:

To meet the toughest requirements of extra heavy load and wide support distances in the most critical industrial environments.

Few but strong

The installation above is assembled with a limited number of parts:

1. KHZP 20C Cable ladder in hot-dip galv
2. T-junction 20C
3. Riser coupling 20C
4. 90° Bend 20C
5. Vertical coupling 20C

When conditions call for extreme loads and the widest support spans

Over the years, the Wibe Cable Ladder system from Wibe Group has been developed to tackle all kinds of harsh environments, such as Oil & Gas and chemical industries. Now the range has been further reinforced.

The latest and most powerful addition to our cable ladder portfolio is KHZP 20C – a strong, high-sided ladder with excellent properties. Meeting the NEMA 20C SWL standard, 149 kg/m at 6-metre span/safety, this new range offers long spans with heavy-load qualities. Nevertheless, the KHZP 20C range enables fast and easy installation. For example, the

couplers are integrated into the ladder sides, providing much faster mounting time than conventional systems requiring splice plates and multiple nuts and bolts. All in all, the KHZP 20C is a solution that contributes heavily to a safe, easily maintained and long lasting installation.

Based on proven expertise and continuous refinement

The KHZP 20C has evolved from many years of renowned development. With impressive dimensions and easy-to-apply accessories, such as bends, risers, T-junctions, couplings and reducers, the KHZP 20C is the ultimate durable solution for demanding installations.

Adjustable vertical coupling

Robust T-junctions

6 m support distance

Riser 20C for internal or external bends

P14.3271

P14.3270

P14.3269

Wibe KHZP 20C is reinforced all the way
All the accessories are dedicated and tested to meet the high load requirements.

P14.3268

Install anywhere at any angle
Fixed angle couplings or couplings that can be adjusted to any angle on the horizontal or vertical plane.

P14.3265

Easy to reduce and expand
Increase or decrease the routing of cables from a wide to a narrow cable ladder.

P14.3266

Engineered to set the standard in commercial building installations.

Modern commercial buildings feature cable routing installations that demand flexibility and efficiency. The revolutionary CLX3 support system is ideal regardless of the cable support required, because it is specifically developed to be smoothly and effectively integrated to the same support system.

CLX3 incorporates a set of unique benefits to deliver the most smart, lean and simple cable routing management.

Single bolt ceiling plate:
Fixes the pendant to the construction ceiling for optimal installation speed.

Pre-determined fixation: Square hole pattern adapted for coach bolt fixation of additional accessories.

Large-size cantilever arms:
Feature modular fixation patterns suitable for narrow ladders.

Time saving: Unique click system takes away the need for fixation clamps, bolts and nuts.

Click to lock: Hear the click and be reassured the component is securely locked.

Robust design: Capable of bearing distances up to 4m, requiring less supports to be installed.

Lean: Fewer components needed, leading to more efficiency all along the process from BIM design through ordering, storage and installation.

Key hole fixation: Smart design to facilitate easy fixation of the pendant to the structural ceiling surface.

Flexible: The pendant accommodates installations close to the wall, corners and any other space.

Performance: Supports adjustments of up to 25 degrees with a single adaptor.

Sleek: Minimum space occupancy inside and below the length of the pendant for central suspension.

Multi-functional: Rail back is identical to the Wibe existing rail 24/48, enabling use of legacy system components.

Convenience: The system is designed for single-handed installation.

Certified according to DIN4102-12 for fire resistance E30, E60 and E90

The Wibe cable ladders meet the toughest product standards:
IEC 61537
DIN 4102-12 for fire resistance classes E30, E60 and E90

The Wibe cable ladder system is also approved by Det Norske Veritas (DNV) for offshore and shipyard use.

The Wibe cable ladder system is also approved according to UL E212854 for use in the US and Canada.

The longer the installation is resistant to fire, the longer the electric system will be able to operate normally. Wibe products with E30, E60 and E90 certification help to protect life and property in the event of a fire. The well-proven, reliable system will prolong the access to critical emergency services, such as fire suppression systems, emergency lighting, ventilation and other basic installations.

About the test

A selection of the Wibe products have proven excellent fire resistance properties. You can feel confident when installing Wibe cable ladders in environments requiring either E30, E60 or E90 certification.

The cable ladders with supporting system and Dätwyler Pyrofil KERAM E30, E60 and

E90 cables were tested for 90 minutes in a temperature of up to 1000°C without collapsing, with the electrical performance still remaining intact.

For installation specification please see the Technical part in this catalogue.

Our Configuration tool – the right choice

The smartest way to be efficient and profitable, is to cut down on costs. Material that is either insufficient or oversized, means actually money down the drain. Our configuration tool helps you calculate the dimensions you need, eliminating waste of your time, money and effort.

Make your specification accurate, flexible and up-to-date

The Wibe/Defem configuration tool is a unique and user-friendly assistant to specifiers, wholesalers and installers. The tool is free of charge and perfect for optimizing the amount of material for any given installation. No previous experience is necessary – all you need is a standard web browser and a personal login (provided from Wibe Group), and you are ready to go.

Make the right choice

It is all about making the right choice. Just specify your requirements regarding environment/corrosion class, load and

support distances etc and you will have a customized selection for your installation. Your calculations are saved, so you can adjust them at any time. The configuration tool is automatically updated as products are launched or replaced, enabling accurate and exact configurations. You can also easily have the BOM (Bill of Material) transferred to Excel, to be used as your shopping list.

Today the configuration tool is available in English, Russian and Swedish, but more versions are under development.

3.2 million metres
manufactured
each year.

Wibe Cable Ladders form the backbone
of the modern infrastructure.

Experience and knowledge take you higher

Creating shared value

Throughout the years we have stacked up an outstanding amount of knowledge and skills as part of our resources for continuous product development.

Another essential contribution to this is the experience of our customers. Together we investigate the needs of today and tomorrow in our common goal towards finding even more effective, sustainable and future-proof solutions. Our close cooperation brings increased knowledge and stronger competitiveness to both parties, resulting in successful projects that draw attention all over the world.

The Wibe cable ladder system handles routing of power, data and control cables. All with outstanding conditions for high performance and problem-free maintenance.

Burj Khalifa, Dubai. The world's tallest building stretches close to 830 m into the air. As a comparison, the Sears Tower in Chicago reaches 442 m and the Empire State Building in New York comes in at 381 m. Increasing demands on longer, taller and wider constructions call for kilometres of cables – and an infrastructure backbone of comprehensive cable support solutions. As the only approved supplier of cable support to the Hyder Consultant with Emaar, Wibe Group Electric delivered 1,500 pcs of KHZP Cable Ladders (9,000 metres).

P257024

Wibe Cable Ladders KHZ and KHZP installed at Borealis Stenungsund.
Borealis in Sweden supports customers with speciality plastics for some of the largest energy supply, oil and water pipeline projects in the world.

Cable ladders KHZPS

Cable ladder for indoor applications in dry environments. With closed side profiles and profile-shaped rungs. Must not be used as walkway.
Material: Steel, pre-galvanized.

KHZPS-150	55/147/6000	225	7321677253500	725350

Pre-galvanized - Corrosion class C2

Joints						
	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
	Joint 21					
P140020		Joint to be used for rigid joining of cable ladders, bends, junctions and risers. Snap-on and fixed by two screws. It also reduces the transition resistance and prevents the ladders from slipping apart. M6 screws included. Material: Steel, Zinc+.				
		21	64/22/300	46	3606480574856	CSU795051
P139854		Joint to be used for rigid joining of cable ladders, bends, junctions and risers. Snap-on and fixed by bending the hooks with a screw driver. It also reduces the transition resistance and prevents the ladders from slipping apart. Material: Steel, Zinc+.				
		21	64/32/200	33	3606480574849	CSU795050
	Joint 9					
P140336		Joint to be used for straight joining of cable ladders KHZ, KHZP and KHZPS. The teeth of the joint should face downwards. Under load, the ladders are prevented from slipping apart. If the joint is above a bracket, the teeth should face upwards. Material: Steel, pre-galvanized.				
		9	52/4/200	16	7321677211159	721115
Couplings						
	Coupling 22					
P140337		Coupling to be used for horizontal or vertical branches at any desired angle. M6 screws included. Material: Steel, pre-galvanized.				
		22	60/24/150	21	7321677211227	721122
	Junction coupling 14					
P140338		Junction coupling to be used for T- and X-junctions. Suitable for cable ladders KHZ, KHZP, KHZSP and KHZPS, all cable widths. M6 screws included. Material: Steel, pre-galvanized.				
		14	65/73/350	49	7321677232123	723212
Clamps						
	Profile clamp 42					
P151014		Profile clamp to be used for installations where the cable ladder is to be fixed to cantilever arms, support brackets, etc. Screw M8 and nut included. Material: Steel, pre-galvanized.				
		42	55/55/30	50	3606485410326	CSU795240
	Profile clamp 42 for fire resistance installations E30 - E90					
P140339		Profile clamp fire resistant certified according to DIN 4102-12. Classification E30 - E90. Specifically to be used to fix the cable ladder KHZPS to cantilever arm 50 or support bracket H50 in fire resistant certified installation configurations. Screw M8 and nut included. Material: Steel, pre-galvanized.				
		42	55/55/30	50	3606485410319	CSU795239
	Profile clamp 41					
P140340		Profile clamp to be used to install a pendant/fixing rail or mounting plate, etc., on the cable ladder profile. Material: Steel, pre-galvanized.				
		41	125/16/30	10	7321677253630	725363
Cantilever arms						
	Cantilever arm 30					
P140088		Cantilever arm for installation inside cable ladder KHZSP. Material: Steel, pre-galvanized.				
		30-200	185/184/80	90	7321677277773	727777
		30-300	185/284/80	110	7321677277780	727778
		30-400	185/384/80	120	7321677277797	727779
		30-500	185/484/80	140	7321677277803	727780
		30-600	185/584/80	160	7321677277810	727781

Pre-galvanized - Corrosion class C2

Cantilever arms

	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
	Cantilever arm 50i					
	Cantilever arm to be used for mountings on walls, vertical pieces or pendant/fixing rails. Material: Steel, pre-galvanized.					
	50i-200	85/250/43		29	7321677914135	791413
	50i-300	110/350/43		46	7321677914142	791414
	50i-400	115/450/44		83	7321677914159	791415
	50i/500	130/580/50		160	3606480911354	CSU795322
	50i/600	130/680/50		186	3606480911361	CSU795323

Wall and support brackets

	Wall bracket 11/25 and 11/75					
	Wall bracket to be used for vertical or horizontal installations of cable ladders against a wall. Maximum loads for vertical mounting: 300 kg (3 kN). For mounting against a rung the max. load is 500 kg (5 kN) for 11/25. Maximum loads for horizontal mounting: 11/25 250 kg (2.5 kN), 11/75 100 kg (1 kN). Material: Steel, pre-galvanized.					
	11/25	85/71/40		24	7321677211050	721105
	11/75	135/71/40		30	7321677211067	721106
	Support bracket 3					
	Support bracket to be used for centre installation of cable ladders on pendant/fixing rails and vertical pieces. Material: Steel, pre-galvanized.					
	3-200	92/57/200		33	7321677218691	721869
	3-300	92/57/300		58	7321677218707	721870
	3-400	92/57/400		78	7321677218714	721871
	3-500	92/57/500		120	7321677218721	721872
	3-600	92/57/600		145	7321677218738	721873
	Support bracket 6					
	Support bracket to be used for centre installation of cable ladders KHZSP. Material: Steel, pre-galvanized.					
	6-200	37/80/184		27	7321677275823	727582
	6-300	37/80/284		45	7321677275830	727583
	6-400	37/80/384		63	7321677275847	727584
	6-500	37/80/484		81	7321677275854	727585
	6-600	37/80/584		99	7321677275861	727586

Vertical pieces

	Vertical piece 2Fi					
	Vertical piece to be used for lighter mountings with Cantilever arm 50i and Cable ladder KHZSP. Material: Steel, pre-galvanized.					
	2Fi-300	272/134/54		97	7321677927234	792723
	2Fi-500	497/134/54		137	7321677927241	792724
	2Fi-750	722/134/54		177	7321677927258	792725
	2Fi-1000	922/134/54		225	7321677927265	792726

Pendant/Fixing rails

	Pendant/Fixing rail 24/34					
	Pendant/Fixing rail for mounting of support brackets, cantilever arms, etc. Material: Steel, pre-galvanized.					
	24/34	293/16/42		23	7321677253579	725357
	24/34	383/16/42		31	7321677253586	725358
	24/34	495/16/42		40	7321677253593	725359
	24/34	698/16/42		56	7321677253609	725360
	24/34	990/16/42		80	7321677253616	725361
	24/34	2970/16/42		240	7321677211029	721102

Pre-galvanized - Corrosion class C2

Pendant/Fixing rails

	Type	Dimensions A/B/C mm	Weight kg/100 pcs	EAN code	Ref. No.
	Pendant/Fixing rail 24/48				
	Pendant/Fixing rail for mounting of support brackets, cantilever arms, etc. Material: Steel, pre-galvanized.				
	24/48	1000/26/48	175	3606481317858	CSU795564
	24/48	2970/26/48	520	7321677317172	731717
	24/48	5940/26/48	1120	7321677317219	731721

Pendant bars

	Pendant bar 1				
	Pendant bar to be installed in order to reduce the deflection of heavily loaded vertical pieces. Installed with T-bolt and Expansion bolt. Material: Steel, pre-galvanized.				
	1-300	362/-/40	35	7321677927272	792727
	1-500	568/-/40	53	7321677927289	792728
	1-800	880/-/40	82	7321677927296	792729

Pendant joint

	Pendant joint 2J and 2FJ				
	Pendant joint to be used for joining pendant/fixing rails and vertical pieces. Screw M8x16 and nuts included. Material: Steel, pre-galvanized.				
	2J	200/48/18	43	7321677211197	721119
	2FJ	200/18/55	46	3606480911385	CSU795325

Ceiling brackets

	Ceiling bracket 5				
	Ceiling bracket to be used for installations with Pendant/Fixing rails 24/34 and 24/48. Screw not included. Material: Steel, pre-galvanized.				
	5	100/135/40	35	7321677211012	721101
	Ceiling bracket 5TPA				
	Ceiling bracket with telescopic function, to be used for mounting of various sizes of trapezoid plates. Including screw MVB 8x16 and nut M6MF8. Breaking load: 150 kg without deformation. Material: Steel, pre-galvanized.				
	5TPA	50/76/79-118	14	7321677321773	732177
	Ceiling bracket 5TP				
	Ceiling bracket to be used in trapezoidal sheeting for installations of Pendant/Fixing rail 24/48. Material: Steel, pre-galvanized.				
	5TP	71/35/50	12	7321677253623	725362
	Ceiling bracket 2Fi				
	Ceiling bracket to be used on Pendant/fixing rail 24/48 to achieve the desired length of vertical pieces. Material: Steel, pre-galvanized.				
	2Fi	131/134/54	50	7321677925544	792554

Wall support

	Wall support 550				
	Wall support for mounting of cantilever arm on porous walls or sandwich wall blocks, with six keyholes for easy fixation. When mounting cantilever arm on support, use screw set 25S (M8). Material: Steel, pre-galvanized.				
	Wall support 550 mm	20/100/550	105	3606485405476	CSU795220
	Wall support 550 mm white	20/100/550	107	3606485405469	CSU795221

Pre-galvanized - Corrosion class C2

Threaded rod

	Type	Dimensions A/B/C mm	Weight kg/100 pcs	EAN code	Ref. No.
  	Threaded rod W76				
	Threaded rod to be used for installations of cable ladders and lighting trunking. Joint nuts are used for the joining of Threaded rods W76. Material: Steel, electro-galvanized.				
	W76 M8-1000	M8/1000	32	7321677250790	725079
	W76 M10-2000	M10/2000	100	7321677167920	716792
	W76 M10-3000	M10/3000	150	7321677167937	716793
	Joint nut M8	40/15/13	5.6	7321677250837	725083
	Flange nut B43				
	Flange nut to be mounted onto Threaded rod W76 in order to lock it to the Support hook and the Ceiling fittings. Package of 50 pcs. Material: Steel, electro-galvanized.				
	B43/M8	17/17/8	0.68	7321677888474	1149405
	Thread lock B50				
	Thread lock to be used when joining Threaded rods. Material: Steel, electro-galvanized.				
	B50/M8	10/20/35	1	7332227014564	1149456
	B50/M10	12/24/35	2	7332227014663	1149466

Take-off hook, end connection

	Fixed take-off hook 4				
	Fixed take-off hook to be used for 90° horizontal branches. Material: Aluminium.				
	4	71/19/86	8	7321677090174	709017
	End connection 10				
	End connection to be used for the connection of a ladder vertically to a floor, or horizontally to a wall. Material: Aluminium.				
	10	60/55/60	8	7321677090181	709018

Fittings for mesh trays

	Combi-fittings B21				
	Combi-fitting to be used when mounting mesh trays onto cable ladders. Material: Steel, electro-galvanized.				
	B21	250/50/20	44	7332227011594	1149159
	B21 90 degrees	120/50/135	44	7332227011914	1149191

Installation and box plates

	Installation plate 61				
	Installation plate to be used on vertical cable ladder installations for mounting of terminal boxes, contact breakers, etc. Material: Steel, pre-galvanized.				
	61-200	310/70/200	100	7321677324866	732486
	61-300	310/70/300	140	7321677324873	732487
	61-400	310/70/400	170	7321677324880	732488
	61-500	310/70/500	240	7321677324897	732489
	Junction box plate 35S				
	Junction box plate, holed or unholed, to be installed upright or hanging from the profile. Locked with locking tabs. For junction boxes, electric light fittings, etc. Material: Steel, pre-galvanized.				
	35S holed	164/20/170	22	7321677112050	711205
	35S unholed	164/20/170	23	7321677302451	730245

Pre-galvanized - Corrosion class C2

Installation and box plates

	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
P40353	Junction box plate 35P					
	Junction box plate with holes, to be installed between rungs. Locked with appropriate locking tabs for each ladder. For junction boxes, electric light fittings, etc. Material: Steel, pre-galvanized.					
	35P	21/106/250		28	7321677186181	718618
P159344	Junction box plate 12xRJ45 Actassi S-One					
	Junction box plate suitable for direct mounting of 12 RJ45 LexCom DPM & S-One RJ45 connectors. Delivered flat, to be bended on site. Additional optional fixation to the cable ladder beam with self-drilling screws. Material: Steel, pre-galvanized.					
	12xRJ45 DPM	300/1/168		30	3606480916762	CSU795353
B224626	Box plate 62					
	Box plate to be used for mounting of outlets and junction boxes on walls, ceilings or floors. Material: Steel, pre-galvanized.					
	62-100	100/15/130		12	7321677834600	783460
	62-200	200/15/130		24	7321677834617	783461

Outlet and junction box sets

P132522	Outlet					
	Outlet, 2-way, enclosed IP44, mounted on a Junction box plate 35S. Material: Steel, pre-galvanized.					
	35S	164/64/170		35	7321677342259	734225
P132523	Outlet, 2-way, unenclosed IP21, mounted on a Junction box plate 35S. Material: Steel, pre-galvanized.					
	35S	164/58/170		33	7321677342266	734226
P123621	Junction box					
	Junction box, IP65, mounted on a Junction box plate 35S. Material: Steel, pre-galvanized.					
	35S With junction box MP	164/56/170		34	7321677319626	731962
	35S With junction box UP	164/56/170		32	7321677319619	731961
B222522	Earth clamp W79					
	Earth clamp to be used when protective earthing of the junction box plate is required. Material: Steel, pre-galvanized.					
	W79	Screw M4/-/4.5		0.2	7321677166404	716640

Bends

P140354	90° bend 15, interior					
	Interior bend piece to be fitted to the cable ladders by using Joint 21, creating a 90° bend. Inner radius 268 mm. Material: Steel, pre-galvanized.					
	15-200	55/597/597		240	7321677230617	723061
	15-300	55/697/697		290	7321677230624	723062
	15-400	55/797/797		340	7321677230631	723063
	15-500	55/897/897		390	7321677230648	723064
	15-600	55/997/997		440	7321677230655	723065

Tele-conduits

P140355	Tele-conduit 36					
	Tele-conduit to be used where a separate tray is required for low-tension cables. Knock-out holes in the bottom of the channel permit the cables to pass through. Material: Steel, pre-galvanized.					
	36-50	24/50/2000		94	7321677250653	725065
	36-100	24/100/2000		142	7321677250660	725066
	36-200	24/200/2000		238	7321677250677	725067

Pre-galvanized - Corrosion class C2

Dividers

	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
	Dividing strip 39					
	Dividing strip to be used to separate low-tension and high-tension cables. Material: Steel, pre-galvanized.					
	39/24	24/24/1750		46	7321677188352	718835
	39/55	55/24/1750		73	7321677257850	725785
	Distance piece W39					
	Distance piece to be used for the joining of Dividing strips 39. Material: Plastic, natural coloured.					
	W39	37/-/330		3	7321677168248	716824

Covers/Cover plates

	Cover W5					
	Cover to be used to protect the cable runs from dust, dirt, liquids, etc. Outdoors, it protects against rain and sun. Suitable for all cable ladders. Material: Steel, pre-galvanized.					
	W5-70	11/73/2000		100	7321677322145	732214
	W5-100	11/103/2000		140	7321677322152	732215
	W5-150	11/153/2000		190	7321677322169	732216
	W5-200	11/203/2000		250	7321677322176	732217

End plugs

Screws and bolts

Marking plate

Reliable, functional and flexible. CLX3 is optimized to deliver for a range of applications.

Central cable ladder support

- Occupies minimum space below the ladder. This is beneficial especially when space beneath the cable routing track is limited.
- Developed on the well established Central Suspension Bracket 6 platform.
- The smooth and rounded design helps prevent damage to cables.

Cantilever arm support

- Slim design to minimize occupied space.
- Integrated click for both Cable ladder and Defem mesh tray in the same product.
- Boltless fixation to the rail

CLX³ Suspension system - Corrosion class C2

Vertical piece

	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
 PTCSU-181	CLX³ pendant 24/48					
	Vertical piece/pendant to be used for ceiling suspended mounting. Perforated pattern to be used with CLX ³ cantilever arm or CLX ³ central suspension adapter. Open side can be used with T-bolt. Material: Steel, pre-galvanized.					
	CLX ³ pendant-300	295/145/53		90.6	3606489904937	CSU795632
	CLX ³ pendant-400	395/145/53		107.5	3606489904944	CSU795633
	CLX ³ pendant-500	495/145/53		124.4	3606489904951	CSU795634
	CLX ³ pendant-700	695/145/53		158.1	3606489904968	CSU795635
	CLX ³ pendant-1000	995/145/53		208.7	3606489904975	CSU795636
	CLX ³ pendant-1500	1495/145/53		294.2	3606481828323	CSU795638
 PTCSU-186	CLX³ pendant rail 24/48					
	Pendant rail to be used for direct wall mounting or for vertical piece/pendants extensions. To be connected to the vertical piece/pendant together with the pendant joint CSU795325. Perforated pattern to be used with CLX ³ cantilever arm. Open side can be used with T-bolt. Material: Steel, pre-galvanized.					
	CLX ³ rail 24/48 300	280/48/26		47.2	3606481828330	CSU795640
	CLX ³ rail 24/48 1000	980/48/26		165.1	3606481828347	CSU795641
	CLX ³ rail 24/48 3000	2980/48/26		502	3606489904982	CSU795637

Adjustable ceiling plate

 PTCSU-187	CLX³ adjustable ceiling plate					
	Adjustable ceiling plate. To be used for angular adjustment of pendant vs ceiling. Adjustment between 0-25°. Adjustable ceiling plate is to be mounted to the CLX ³ pendant. To be assembled with 4 screw set 22S (713694), need to be ordered separately. Tightening force of the screw set minimum torque 20 N.m. Material: Steel, pre-galvanized.					
	CLX ³ adjustable ceiling plate	150/100/59		49.8	3606489904999	CSU795639

Cantilever arms

 PTCSU-191	CLX³ Cantilever arm					
	Cantilever arm to be used for mounting on vertical pieces or pendant/fixing rails. The cantilever arm is designed for fast click fixation of ladder type KHZSP, Defem mesh tray height 60/110 and Stago tray KG281/KB184/KB284 height 60. Stago trays need to be fastened with the fast fixing clamp (CSU08490100). Material: Steel, pre-galvanized.					
	CLX ³ cantilever arm 200	62/280/49		42.8	3606489905026	CSU795647
	CLX ³ cantilever arm 300	62/380/49		60.5	3606489905033	CSU795648
	CLX ³ cantilever arm 400	92/480/49		90.9	3606489905040	CSU795649
	CLX ³ cantilever arm 500	92/580/49		106.6	3606489905057	CSU795650
	CLX ³ cantilever arm 600	92/680/49		119.7	3606489905064	CSU795651

Central suspensions

 PTCSU-202	CLX³ central suspension bracket, ladder KHZSP					
	Central suspension bracket be used for mounting Wibe cable ladders type KHZSP on vertical pieces. The central suspension bracket shall first be assembled together with the CLX ³ central suspension adapter (CSU795700) to be able to click in the perforation pattern on the vertical piece. Material: Steel, pre-galvanized.					
	200	37/78/185		33.4	3606489905101	CSU795655
	300	37/78/285		53.1	3606489905118	CSU795656
	400	37/78/385		72	3606489905125	CSU795657
	500	37/78/485		90.1	3606489905132	CSU795658
 PTCSU-211	600	37/78/585		109	3606489905149	CSU795659
	(*) the central suspension bracket shall first be assembled together with the CLX ³ central suspension adapter (CSU795700) to be able to click in the perforation pattern on the vertical piece.					
	CLX³ central suspension adapter					
	Central suspension adapter to be first clicked to a CLX ³ central suspension bracket of choice. The adaptor fits to all types of CLX ³ central suspension brackets; ladder, tray and mesh. In a second step the adaptor with the central suspension bracket mounted is clicked in the perforation pattern in the rail or the pendant. Material: Steel, pre-galvanized.					
	CLX ³ CSB adapter	166/31/39		17.7	3606489905248	CSU795700

Wall bracket

	Wall bracket for CLX³ cantilevers.					
	To be used for direct fixation to wall. Single bolt fixation in keyhole, alternatively multi-bolt fixation in lateral holes for softer walls. Bolts are not included. Material: Steel, pre-galvanized.					
	Wall bracket for CLX ³ cantilevers	163/101/26		34	7321677958047	CSU795804

Pre-galvanized - Corrosion class C2

Tools

P128977

**Cable roller S**

Cable roller used to facilitate the pulling of cables and lines. Easily installed on all Wibe cable ladders except the high-sided WHS ladders (outer mounting hole). Also suitable for external/internal profiles of all 90° bends, T-junctions, X-junctions and risers (inner mounting hole). With a height adjustment of 45 mm to leave room for cables to pass under the roller.
Material: Steel, electro-galvanized.

Joints					
	Type	Dimensions A/B/C mm 	Weight kg/100 pcs	EAN code	Ref. No.
 P140020	Joint 21 Joint to be used for straight, rigid joining of cable ladders, bends, junctions and risers. It also reduces the transition resistance and prevents the ladders from slipping apart. M6 screws included. Material: Steel, hot-dip galvanized.				
	21	64/22/300	46	7321677911998	791199
 P140020	Joint to be used for rigid joining of cable ladders, bends, junctions and risers. Snap-on and fixed by two screws. It also reduces the transition resistance and prevents the ladders from slipping apart. M6 screws included. Material: Steel, Zinc+.				
	21Zinc+	64/22/300	46	3606480574856	CSU795051
 P133054	Joint to be used for rigid joining of cable ladders, bends, junctions and risers. Snap-on and fixed by bending the hooks with a screw driver. It also reduces the transition resistance and prevents the ladders from slipping apart. Material: Steel, Zinc+.				
	21Zinc+	64/32/200	33	3606480574849	CSU795050
 P133017	Joint 9 Joint to be used for straight joining of cable ladders KHZ, KHZP and KHZPS. The teeth of the joint should face downwards. Under load, the ladders are prevented from slipping apart. If the joint is above a bracket, the teeth should face upwards. Material: Steel, hot-dip galvanized.				
	9	52/4/200	16	7321677053049	705304
 P133018	Dropper joint 32 Dropper joint used to form vertical branches in centre position under/on top of cable ladders. Screw M6 included. Material: Steel, hot-dip galvanized.				
	32	130/22/200	75	7321677347131	734713
 P133019	Joint 45 Joint to be fitted as a joining plate in a cut KHZV/KHZPV ladder. Screws M8 and M12 + nuts are included. Material: Steel, hot-dip galvanized.				
	45	150/4/95	50	7321677076093	707609

Hot Dip-galvanized - Corrosion class C3, C4

Couplings						
	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
P135056	Coupling 22					
	Coupling to be used for horizontal or vertical branches at any desired angle. M6 screws included. Material: Steel, hot-dip galvanized.					
	22	60/24/150		21	7321677184095	718409
P135020	Junction coupling 14					
	Junction coupling to be used for T- and X-junctions. Suitable for cable ladders KHZ, KHZP, KHZSP and KHZPS, all cable widths. M6 screws included. Material: Steel, hot-dip galvanized.					
	14	65/73/350		49	7321677250967	725096
P135021	Coupling 44					
	Coupling to be used for horizontal coupling of cable ladders KHZV/KHZPV. Also to be used for branches and as an end connection against a wall. Four screws M8x30 and nuts are included. Material: Steel, hot-dip galvanized.					
	44	135/-/120		50	7321677208159	720815
P143550	Horizontal coupling for bending 20C					
	Coupling to be used for horizontal connection of cable ladders KHZP 20C range. Also to be used for branches and as an end connection against a wall. Four screws M8x30 and nuts are included. Material: Steel, hot-dip galvanized.					
	For Bending 20C	180/15/120		55	3606480739583	CSU795210
P143551	Horizontal coupling 20C					
	Coupling to be used for horizontal connection of cable ladders KHZP 20C range. Four screws M8x30 and nuts are included. Material: Steel, hot-dip galvanized.					
	20C	180/15/120		94	3606480739590	CSU795211
P135022	Coupling 51					
	Coupling to be used as a self-supporting vertical coupling of cable ladders KHZV/KHZPV. Two screws M12 and nuts are included. Material: Steel, hot-dip galvanized.					
	51	150/-/193+138		150	7321677318377	731837
P143552	Vertical coupling					
	Coupling to be used as a self-supporting vertical coupling of cable ladders KHZP 20C range. Adjustable from 10° to 90° gradually in steps of 20°. Two screws M12 and nuts are included. Material: Steel, hot-dip galvanized.					
	20C	190/4/250		221	3606480739538	CSU795205
Clamps, support piece						
P151015	Profile clamp 42					
	Profile clamp to be used for installations where the cable ladder is to be fixed to cantilever arms, support brackets, etc. Screw M8 and nut included. Material: Steel, hot-dip galvanized.					
	42	55/55/30		56	3606485410340	CSU795242
P151014	Profile clamp 42 Zinc+					
	Profile clamp to be used for installations where the cable ladder is to be fixed to cantilever arms, support brackets, etc. Screw M8 and nut included. Material: Steel, Zinc+.					
	42 Zinc+	55/55/30		56	3606485410333	CSU795241
P135024	Profile clamp 43					
	Profile clamp to be used for installations where the cable ladders KHZV and KHZPV are to be fixed to cantilever arms, support brackets, etc. Screw M8 and nut included. Material: Steel, hot-dip galvanized.					
	43	21/43/30		5	7321677075119	707511

Hot Dip-galvanized - Corrosion class C3, C4

Clamps, support piece

	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
P139925 P139926	Clamp 12					
	Clamp to be used on the side profile of the cable ladder for installation of accessories. Bolt and nut included. Material: Steel, hot-dip galvanized.					
	12/70	125/25/40		19	7321677286539	728653
	12/120	175/25/40		24	7321677286546	728654
P14347	Profile clamp 20C					
	Profile clamp for KH2P 20 range to be used for installations where the cable ladder is to be fixed to cantilever arms, I-beams, etc. Material: Steel, hot-dip galvanized.					
	20C	190/57/40		26	3606480739521	CSU795168
P139927	Profile clamp 41					
	Profile clamp to be used to install a pendant/fixing rail or mounting plate, etc., on the cable ladder profile. Material: Steel, hot-dip galvanized.					
	41	125/16/30		10	7321677208241	720824
P139928	Profile support piece 46					
	Profile support piece to be fitted between the ladder and the vault pipe when a support bracket is positioned between existing profile support pieces. For cable ladders KH2V and KH2PV. Material: Steel, hot-dip galvanized.					
	46	72/18/30		15	7321677080014	708001

Cantilever arms

P139932	Cantilever arm 50i					
	Cantilever arm to be used for lighter mountings on walls, vertical pieces or pendant/fixing rails. Material: Steel, hot dip galvanized..					
	50i/100	120/180/40		42	3606480911293	CSU795316

	11/75	135/71/40		30	7321677132034	713203
P139535 	Wall bracket 20					
	Wall bracket to be used at installation of Pendant/fixing rail 24/20 to ceiling beam or wall. Material: Steel, hot-dip galvanized.					
	20	50/59/154		47	7321677234509	723450
P139536 	Wall bracket 20F					
	Wall bracket to be used at installation of Pendant/fixing rail 20F to ceiling beam or wall. Material: Steel, hot-dip galvanized.					
	20F	50/93/150		69	7321677234516	723451
P143288 	Wall support 550					
	Wall support for mounting of cantilever arm on porous walls or sandwich wall blocks, with six keyholes for easy fixation. When mounting cantilever arm on support, use screw set 25S (M8). Material: Steel, hot-dip galvanized.					
	Wall support 550 mm	20/100/550		105	3606480985287	CSU795365

Hot Dip-galvanized - Corrosion class C3, C4

Vertical pieces

P135937

Type	Dimensions A/B/C mm	Weight kg/100 pcs	EAN code	Ref. No.
------	------------------------	----------------------	----------	----------

Vertical piece 2

Vertical piece to be used for installation of Support bracket 3, symmetrical loading. Not suitable for cable ladders KHV and KHVPV. Can be joined to Pendant/fixing rail 24/34 with Pendant joint 2J.
Material: Steel, hot-dip galvanized.

	93, black	103/0.7/100		5	7321677377084	737708

Marking label

P138944	Marking label, equipotential					
	Label to be used to show that a construction is equipotentially bonded. Available in Swedish (other languages on request). Printed on self-adhesive yellow vinyl, 250 labels per roll. Material: Self-adhesive vinyl.					
	Marking label	25/-/86		-	7321677868605	786860

Mounting accessories

PTCSU-104	Mounting rail WMS25L					
	Mounting rail to be used for installation directly on wall for lashing of cables. Material: Steel, Zink+.					
	WMS25L	27/6/2000		35	3606489584955	CSU795597
P140075	Threaded rod W76					
	Threaded rod for M8 ceiling mounting of cable support. For fixing, use Flange Nut M8 and for extension, Distance nut M8. Material: Steel, hot-dip galvanized.					
	W76/M8	8/8/1000		32	3606480483783	CSU794697
		8/8/2000		64	3606480483776	CSU734698
P140154	Flange nut					
	Flange Nut M8 to be mounted on Threaded rod W76. Intended for ceiling mounting of cable support. Material: Steel, hot-dip galvanized.					
	Flange nut M8	17/17/8		1	3606480483806	CSU794715
P140155	Distance nut					
	Distance nut M8 to be used as an extension and a coupler of Threaded rod W76. Intended for ceiling mounting of cable support. Material: Steel, hot-dip galvanized.					
	Distance nut M8	15/15/30		4	3606480483790	CSU794699

Hot Dip-galvanized - Corrosion class C3, C4

Paint

P143450

**Anti-corrosive repair paint**

Anti-corrosive repair paint Galvafröid for the repair of damages on pre-galvanized or hot-dip galvanized ladders and accessories.

Galvafröid, 0,4 litre tin	—	104	7321677176373	717637

Tools

P129877

**Cable roller S**

Cable roller used to facilitate the pulling of cables and lines. Easily installed on all Wibe cable ladders except the high-sided WHS ladders (outer mounting hole). Also suitable for external/internal profiles of all 90° bends, T-junctions, X-junctions and risers (inner mounting hole). With a height adjustment of 45 mm to leave room for cables to pass under the roller.
Material: Steel, electro-galvanized.

Joints

	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
Joint 21						
P140401	Joint to be used for straight, rigid joining of cable ladders, bends, junctions and risers. It also reduced the transition resistance and prevents the ladders from slipping apart. M6 screws included. Material: Steel, Zinkpox coated white.					
	21	64/22/300		46	7321677912001	791200
Joint 9						
P140402	Joint to be used for straight joining of cable ladders KHZ, KHZP and KHZPS. The teeth of the joint should face downwards. Under load, the ladders are prevented from slipping apart. If the joint is above a bracket, the teeth should face upwards. Material: Steel, Zinkpox coated white.					
	9	52/4/200		16	7321677140664	714066
Dropper joint 32						
P140403	Dropper joint used to form vertical branches in centre position under/on top of cable ladders. Screw M6 included. Material: Steel, Zinkpox coated white.					
	32	130/22/200		75	7321677808748	780874
Joint 45						
P140404	Joint to be fitted as a joining plate in a cut KHZV/KHZPV ladder. Screws M8 and M12 + nuts are included. Material: Steel, Zinkpox coated white.					
	45	150/4/95		50	7321677142279	714227

Couplings

Coupling 22						
P140405	Coupling to be used for horizontal or vertical branches at any desired angle. M6 screws included. Material: Steel, Zinkpox coated white.					
	22	60/24/150		21	7321677184101	718410
Junction coupling 14						
P140406	Junction coupling to be used for T- and X-junctions. Suitable for cable ladders KHZ, KHZP, KHZSP and KHZPS, all cable widths. M6 screws included. Material: Steel, Zinkpox coated white.					
	14	65/73/350		49	7321677909063	790906
Coupling 44						
P140407	Coupling to be used for horizontal coupling of cable ladders KHZV/KHZPV. Also to be used for branches and as an end connection against a wall. Four screws M8x30 and nuts are included. Material: Steel, Zinkpox coated white.					
	44	135/-/120		50	7321677208166	720816
Coupling 51						
P140408	Coupling to be used as a self-supporting vertical coupling of cable ladders KHZV/KHZPV. Two screws M12 and nuts are included. Material: Steel, Zinkpox coated white.					
	51	150/-/193+138		150	7321677319114	731911

Clamps

Profile clamp 42						
P151016	Profile clamp to be used for installations where the cable ladder is to be fixed to cantilever arms, support brackets, etc. Screw M8 and nut included. Material: Steel, Zinkpox coated white.					
	42	55/55/30		56	3606485410357	CSU795243
Profile clamp 43						
P140410	Profile clamp to be used for installations where the cable ladders KHZV and KHZPV are to be fixed to cantilever arms, support brackets, etc. Screw M8 and nut included. Material: Steel, Zinkpox coated white.					
	43	21/43/30		5	7321677141654	714165
Clamp 12						
P140411	Clamp to be used on the side profile of the cable ladder for installation of accessories. Bolt and nut included. Material: Steel, Zinkpox coated white.					
	12/70	125/25/40		19	7321677329779	732977
	12/120	175/25/40		24	7321677329786	732978

Zinkpox - Corrosion class C5-I

Clamps						
	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
 P140412	Profile clamp 41					
	Profile clamp to be used to install a pendant/fixing rail or mounting plate, etc., on the cable ladder profile. Material: Steel, Zinkpox coated white.					
	41	125/16/30		10	7321677219452	721945
 P140413	Profile support piece 46					
	Profile support piece to be fitted between the ladder and the vault pipe when a support bracket is positioned between existing profile support pieces. For cable ladders KHZV and KHZPV. Material: Steel, Zinkpox coated white.					
	46	72/18/30		15	7321677141791	714179
Cantilever arms

	Wall support 550					
	Wall support for mounting of cantilever arm on porous walls or sandwich wall blocks, with six keyholes for easy fixation. When mounting cantilever arm on support, use screw set 25S (M8). Material: Steel, Zinkpox coated white.					
	Wall support 550 mm	20/100/550		1047	3606480985294	CSU795366

Zinkpox - Corrosion class C5-I

Vertical pieces

	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
P140422	Vertical piece 2					
	Vertical piece to be used for installation of Support bracket 3, symmetrical loading. Not suitable for cable ladders KHZV and KHZPV. Can be joined to Pendant/fixing rail 24/34 with Pendant joint 2J. Material: Steel, Zinkpox coated white.					
	2-300	279/80/135		52	7321677162833	716283

1-1500	1296/35/50	560	7321677205301	720530
Rail fixing support 24/20F, 24/20FS				
Rail fixing support to be used with Pendant/fixing rails 24/20F and 24/20FS respectively, for mounting between floor and ceiling. Material: Steel, Zinkpox coated white.				
24/20F	106/165/80	167	7321677205271	720527
24/20FS	106/185/80	190	7321677205288	720528

Brackets, pendant joint

Angle bracket 5L				
Angle bracket to be used for steel wire installation in ceilings. Also used when assembling pendant/fixing rails to frames for switching cabinets and electrical control centres and for fixing an upright between floor and ceiling. Assembled with a T-bolt. Material: Steel, Zinkpox coated white.				
5L	70/45/49	15	7321677317929	731792
Angle bracket 5LS				
Angle bracket to be used when assembling pendant/fixing rails to frames for switching cabinets and electrical control centres and for fixing an upright between floor and ceiling. Assembled with a T-bolt. Material: Steel, Zinkpox coated white.				
5LS	111/71/60	50	7321677205295	720529
Bracket 60/40				
Bracket to be used together with Pendant/fixing rail 24/48 to reduce the deflection of long vertical pieces. Material: Steel, Zinkpox coated white.				
60/40	95/23/40	10	7321677205318	720531
Pendant joint 2J, 2FJ and 20J				
Pendant joint to be used for joining pendant/fixing rails and vertical pieces. Screws M8x16 (2J and 2FJ) or M8x70 (20J) and nuts included. Material: Steel, Zinkpox coated white.				
2J	200/48/18	43	7321677163038	716303
2FJ	200/55/18	46	7321677163045	716304
20J	200/55/36	94	7321677163021	716302

Zinkpox - Corrosion class C5-I

Ceiling brackets

	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
P140442	Ceiling bracket 5					
	Ceiling bracket to be used for installations with Pendant/Fixing rails 24/34 and 24/48. Screw not included. Material: Steel, Zinkpox coated white.					
	5	100/135/40		35	7321677162932	716293
P140443	Ceiling bracket 5TP					
	Ceiling bracket to be used for installations of Vertical pieces 2, 2F and 20 in ceilings with a trapezoidal sheet profile. Material: Steel, Zinkpox coated white.					
	5TP	75/35/50		12	7321677162956	716295

Take-off hook

P138957	Fixed take-off hook 4					
	Fixed take-off hook to be used for 90° horizontal branches. Material: Aluminium.					
	4	71/19/86		8	7321677140671	714067
P140444	Take-off hook 47					
	Take-off hook to be used on cable ladders KHZV and KHZPV to make 90° branches. Screw M12 and nuts are included. Material: Steel, Zinkpox coated white.					
	47	155/10/73		27	7321677914012	791401

End connection

P139964	End connection 10					
	End connection to be used for the connection of a ladder vertically to a floor, or horizontally to a wall. Material: Aluminium.					
	10	60/55/60		8	7321677140855	714085

Lighting bracket

P140445	Lighting bracket 200					
	Lighting bracket to be used for the installation of lighting fittings beneath cable ladders KHZV and KHZPV 200. Material: Steel, Zinkpox coated white.					
	200	24/25/215		16	7321677186440	718644

Beam clamp

P140446	Beam clamp 5BK					
	Beam clamp to be used for the installation of Vertical pieces 2, 2F or 20 on I-beams. For flange thickness max. 13 mm and 14-30 mm respectively. Material: Steel, Zinkpox coated white.					
	5BK-10 (max. 13 mm)	30/50/45		15	7321677162949	716294
	5BK-30 (14-30 mm)	50/50/45		18	7321677184873	718487

Back plate

P140447	Back plate 40					
	Back plate to be used for installation behind Cantilever arm 50 to reduce the surface pressure on porous walls. Material: Steel, Zinkpox coated white.					
	40	150/-/60		55	7321677140299	714029

Zinkpox - Corrosion class C5-I

Bends

P140448

Riser 18

Riser piece to be fitted to the cable ladders by using Joint 21.
Material: Steel, Zinkpox coated white.

Cross member plug 27						
Cross member plug to be installed at the ends of the rungs of KHZ and KHZV. Used in premises with a high corrosion risk. Material: PE, grey.						
P140071	27	Ø20/10		0.15	7321677266685	726668

Marking plates

Marking plate 93						
Marking plates are part of a colour marking system that is easy to use when you want to mark out the type of cable that is placed on the cable ladder. Five different colours are available.						
B223240	93, yellow	103/0.7/100		5	7321677377046	737704
	93, orange	103/0.7/100		5	7321677377053	737705
	93, blue	103/0.7/100		5	7321677377060	737706
	93, green	103/0.7/100		5	7321677377077	737707
	93, black	103/0.7/100		5	7321677377084	737708
Marking label, equipotential						
Label to be used to show that a construction is equipotentially bonded. Available in Swedish (other languages on request). Printed on self-adhesive yellow vinyl, 250 labels per roll. Material: Self-adhesive vinyl.						
P138044	Marking label	25/-/86		-	7321677868605	786860

Paint

Repair paint						
Repair paint for the repair of minor damages of powder-coated products. Colour white RAL 9003, gloss 30.						
B224226	Spray bottle, 0.4 litres	—		60	7321677397136	739713

Tools

Cable roller S						
Cable roller used to facilitate the pulling of cables and lines. Easily installed on all Wibe cable ladders except the high-sided WHS ladders (outer mounting hole). Also suitable for external/internal profiles of all 90° bends, T-junctions, X-junctions and risers (inner mounting hole). With a height adjustment of 45 mm to leave room for cables to pass under the roller. Material: Steel, electro-galvanized.						
P129677	S	230/80/204		230	7321677186600	718660
Cable roller 38 Rig'n roll						
Cable roller used for mounting on Wibe cable ladders with belonging junctions and branches. Material: Stainless steel AISI316L (cable roller).						
P148449	38 Rig'n roll	220/50/130		48	7321677359981	735998

Joints

	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
P139855	Joint 21					
	Joint to be used for straight, rigid joining of cable ladders, bends, junctions and risers. It also reduces the transition resistance and prevents the ladders from slipping apart. M6 screws included. Material: Stainless steel AISI316L.					
	21	64/22/200		37	7321677257515	725751
P139819	Joint 45					
	Joint to be fitted as a joining plate in a cut KHZPV ladder. Screws M8 and M12 + nuts are included. Material: Stainless steel AISI316L.					
	45	150/4/95		50	7321677928736	792873

Couplings

P139856	Coupling 22					
	Coupling to be used for horizontal or vertical branches at any desired angle. M6 screws included. Material: Stainless steel AISI316L.					
	22	60//24/150		21	7321677257607	725760
P139820	Junction coupling 14					
	Junction coupling to be used for T- and X-junctions. Suitable for cable ladders KHZ, KHZP, KHZSP and KHZPS, all cable widths. M6 screws included. Material: Stainless steel AISI316L.					
	14	65/73/350		49	7321677271955	727195
P139821	Coupling 44					
	Coupling to be used for horizontal coupling of cable ladders KHZV/KHZPV. Also to be used for branches and as an end connection against a wall. Four screws M8x30 and nuts are included. Material: Stainless steel AISI316L.					
	44	135/-/120		50	7321677928880	792888
P139822	Coupling 51					
	Coupling to be used as a self-supporting vertical coupling of cable ladders KHZV/KHZPV. Two screws M12 and nuts are included. Material: Stainless steel AISI316L.					
	51	150/-/193+138		150	7321677319145	731914

Clamps, support piece

P139823	Profile clamp 42					
	Profile clamp to be used for installations where the cable ladder is to be fixed to cantilever arms, support brackets, etc. Screw M8 and nut included. Material: Stainless steel AISI316L.					
	42	54/57/30		11	7321677257638	725763
P139824	Profile clamp 43					
	Profile clamp to be used for installations where the cable ladders KHZV and KHZPV are to be fixed to cantilever arms, support brackets, etc. Screw M8 and nut included. Material: Stainless steel AISI316L.					
	43	21/43/30		5	7321677928934	792893
P139825 P139826	Clamp 12					
	Clamp to be used on the side profile of the cable ladder for installation of accessories. Bolt and nut included. Material: Stainless steel AISI316L.					
	12/70	125/25/40		19	7321677286515	728651
	12/120	175/25/40		24	7321677286522	728652
P139827	Profile clamp 41					
	Profile clamp to be used to install a pendant/fixing rail or mounting plate, etc., on the cable ladder profile. Material: Stainless steel AISI316L.					
	41	125/16/30		10	7321677833740	783374
P139828	Profile support piece 46					
	Profile support piece to be fitted between the ladder and the vault pipe when a support bracket is positioned between existing profile support pieces. For cable ladders KHZV and KHZPV. Material: Stainless steel AISI316L.					
	46	72/18/30		15	7321677928774	792877

Stainless Steel AISI 316L - Corrosion class C5-M

Cantilever arms

	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
 P140016	Cantilever arm 50					
	Cantilever arm for mounting on walls, pendant/fixing rails or vertical pieces. Material: Stainless steel AISI316L.					
	50-100	85/150/40		24	7321677256181	725618

Wall and support brackets

 P140022	Support bracket 3					
	Support bracket to be used for centre installation of cable ladders on pendant/fixing rails and vertical pieces. Material: Stainless steel AISI316L.					
	3-150	70/39/154		15	7321677264339	726433
	3-200	70/39/204		20	7321677264346	726434
	3-300	70/40/306		47	7321677264353	726435
	3-400	70/40/406		62	7321677264360	726436
	3-500	70/40/506		103	7321677264377	726437
	3-600	70/40/606		123	7321677264384	726438
 P130934 P130935	Wall bracket 11/25 and 11/75					
	Wall bracket to be used for vertical or horizontal installations of cable ladders against a wall. Maximum loads for vertical mounting: 300 kg (3 kN). For mounting against a rung the max. load is 500 kg (5 kN) for 11/25. Maximum loads for horizontal mounting: 11/25 250 kg (2.5 kN), 11/75 100 kg (1 kN). Material: Stainless steel AISI316L.					
	11/25	85/71/40		24	7321677257744	725774
 P143289	Wall support 550					
	Wall support for mounting of cantilever arm on porous walls or sandwich wall blocks, with six keyholes for easy fixation. When mounting cantilever arm on support, use screw set 25S (M8). Material: Stainless steel AISI316L.					
	Wall support 550 mm	20/100/550		105	3606480985300	CSU795367

Brackets

 P130953	Angle bracket 5L					
	Angle bracket to be used for steel wire installation in ceilings. Also used when assembling pendant/fixing rails to frames for switching cabinets and electrical control centres and for fixing an upright between floor and ceiling. Assembled with a T-bolt. Material: Stainless steel AISI316L.					
 P130954	5L	70/45/49		15	7321677317936	731793
	Angle bracket 5LS					
 P130959 P130960	Angle bracket to be used when assembling pendant/fixing rails to frames for switching cabinets and electrical control centres and for fixing an upright between floor and ceiling. Assembled with a T-bolt. Material: Stainless steel AISI316L.					
	5LS	111/71/60		50	7321677256365	725636
	Pendant joint 2J and 2FJ					
	Pendant joint to be used for joining pendant/fixing rails and vertical pieces. Screws M8x16 and nuts included. Material: Stainless steel AISI316L.					
	2J	200/48/18		43	7321677264841	726484
	2FJ	200/55/18		46	7321677264858	726485

Ceiling bracket

 P130901	Ceiling bracket 5					
	Ceiling bracket to be used for installations with Pendant/Fixing rails 24/34 and 24/48. Screw not included. Material: Stainless steel AISI316L.					
	5	100/135/40		35	7321677255733	725573

Take-off hook

 P130958	Take-off hook 47					
	Take-off hook to be used on cable ladders KHZV and KHZPV to make 90° branches. Screw M12 and nuts are included. Material: Stainless steel AISI316L.					
	47	155/10/73		27	7321677928750	792875

Stainless Steel AISI 316L - Corrosion class C5-M

Vertical pieces

P135937

Vertical piece 2

Vertical piece to be used for installation of Support bracket 3, symmetrical loading. Not suitable for cable ladders KHZV and KHZPV. Can be joined to Pendant/fixing rail 24/34 with Pendant joint 2J.
Material: Stainless steel AISI316L.

Tele-conduits

P140041	Tele-conduit 36					
	Tele-conduit to be used where a separate tray is required for low-tension cables. Knock-out holes in the bottom of the channel permit the cables to pass through. Material: Stainless steel AISI316L.					
		36-50	24/50/2000	94	7321677255900	725590
		36-100	24/100/2000	142	7321677255917	725591
		36-200	24/200/2000	238	7321677255924	725592

Dividers

P140042	Dividing strip 39					
	Dividing strip to be used to separate low-tension and high-tension cables. Material: Stainless steel AISI316L.					
		39/24	24/24/1750	46	7321677255931	725593
P140043		39/55	55/24/1750	73	7321677255948	725594

Stainless Steel AISI 316L - Corrosion class C5-M

Dividers

	Type	Dimensions A/B/C mm		Weight kg/100 pcs	EAN code	Ref. No.
P140044	Distance piece W39					
	Distance piece to be used for the joining of Dividing strips 39. Material: Plastic, natural coloured.					
	W39	37/-/330		3	7321677168248	716824

Covers/Cover plates

P140045	Cover 64					
	Cover to be used for vertically mounted cable ladders. Material: Stainless steel AISI316L.					
	64-150	10/151/2000		290	7321677825851	782585

Screw set W34						
 P140766	Screw set to be used for the fastening of dividing strips on cable ladders KHZSP, KHZP and KHZPV. Set including screw MSCS 6x12 and nut M6MF 6. Material: Stainless steel AISI316.					
	W34	—		0.8	7321677255894	725589

Stainless Steel AISI 316L - Corrosion class C5-M

Screws, bolts and nuts

	Type	Dimensions A/B/C mm	Weight kg/100 pcs	EAN code	Ref. No.
P140148	Screw set M12				
	Screw set to be used for all joints with cable ladders KHZPV. Set including four bolts M6S 12x25 and four nuts M6M 12. Material: Stainless steel AISI316.				
	M12	—	20	7321677287673	728767
P140161	Screw set 22S				
	Screw set to be used for installation of Support bracket 3 on Vertical piece 2, Support bracket 3 and Ceiling bracket 5 on Pendant/fixing rails 24/34 and 24/48, Angle bracket 5L against the back of Pendant/fixing rails, Pendant/fixing rails back to back. Set including screw MVBF 8x16 and nut M6MF8. Material: Stainless steel AISI316.				
	22S	—	1.9	7321677255825	725582
PTOLC-273	Screw set 25S				
	Screw set to be used for installation of Cantilever arm 30, 50i and 50 on Wall support plate. Set including screw MVBF 8x25 and nut M6MF8. Material: Stainless steel AISI316.				
	25S	—	2,2	3606489567057	CSU795587
P140162	Spring nut M8/M10				
	Spring nut to be used for fastening of accessories (control panels, etc.) on Pendant/fixing rail 24/48. Material: Stainless steel AISI316.				
	M10	—	3.9	7321677286225	728622
P140466	Screw M10x20				
	Screw to be used with Spring nut M10 for the installation of Cantilever arm 50 on Pendant/fixing rail 24/48. Material: Stainless steel AISI316.				
	M6S	—	2,2	7321677286492	728649

Marking plate

B223240	Marking plate 93				
	Marking plates are part of a colour marking system that is easy to use when you want to mark out the type of cable that is placed on the cable ladder. Five different colours are available.				
	93, yellow	103/0.7/100	5	7321677377046	737704
	93, orange	103/0.7/100	5	7321677377053	737705
	93, blue	103/0.7/100	5	7321677377060	737706
	93, green	103/0.7/100	5	7321677377077	737707
P138944	93, black	103/0.7/100	5	7321677377084	737708
	Marking label, equipotential				
	Label to be used to show that a construction is equipotentially bonded. Available in Swedish (other languages on request). Printed on self-adhesive yellow vinyl, 250 labels per roll. Material: Self-adhesive vinyl.				
	Marking label	25/-/86	—	7321677868605	786860

Tools

P126977	Cable roller S				
	Cable roller used to facilitate the pulling of cables and lines. Easily installed on all Wibe cable ladders except the high-sided WHS ladders (outer mounting hole). Also suitable for external/internal profiles of all 90° bends, T-junctions, X-junctions and risers (inner mounting hole). With a height adjustment of 45 mm to leave room for cables to pass under the roller. Material: Steel, electro-galvanized.				
	S	230/80/204	230	7321677186600	718660
P146449	Cable roller 38 Rig'n roll				
	Cable roller used for mounting on Wibe cable ladders with belonging junctions and branches. Material: Stainless steel AISI316L (cable roller).				
	38 Rig'n roll	220/50/130	48	7321677359981	735998
P145452	Bag				
	Bag	375/160/460	230	7321677801862	780186
	Set 66 (1 bag + 10 Cable rollers 38 Rig'n roll)	375/160/460	710	7321677801879+	780187

The right surface treatment – crucial for a successful outcome

A cable support installation is considered to be a long-lasting solution and the life expectancy is dependent on the environment in which it is placed. A thorough investigation of the setting in terms of corrosion, pollution, humidity, salt, sanitary regulations etc will help you make the best choice. Our range of cable ladders and accessories covers all types of surface treatments, enabling a reliable, cost-efficient and long-lasting cable support solution.

C1 Electro-galvanized

Indoor environments: Schools, shops, hotels, offices, sports halls etc.

- Very low environmental corrosion.
- Heated areas.
- Arid atmosphere.
- Insignificant quantities of pollutant.
- ISO 2081.

C2 Pre-galvanized

Partly outdoor environments: Industries, sports halls, warehouses, shops, rural outdoor areas etc.

- Low environmental corrosion.
- Non-heated areas with fluctuating levels of temperature and humidity.
- Few instances of condensation and low levels of airborne pollution.
- SS-EN 10346

C3 Hot-dip galvanized

Indoor- and outdoor environments: Urban and light industrial areas, breweries, dairies, laundries etc.

- Average environmental corrosion.
- Areas with average levels of humidity and some airborne pollution caused by production processes.
- Atmospheres containing some salt or average levels of airborne pollution.
- EN-ISO1461/EN 10346 (Z+)

C4 Hot-dip galvanized

Indoor- and outdoor environments: Chemical plants, industrial and coastal areas, swimming pools, farms, dockyards etc.

- High environmental corrosion.
- Areas with high levels of humidity and considerable airborne pollution.
- Atmospheres with average salt content or discernible levels of airborne pollution.
- EN-ISO1461

P34672

C5-I Zinkpox® (Hot dip galv. + powder coated) Stainless steel AISI 304

Indoor- and outdoor environments: Chemical and heavy industries, tunnels, swimming pools, dockyards etc.

- Very high (industrial) environmental corrosion.
- Areas with almost permanent condensation, large quantities of airborne pollution, high levels of humidity and aggressive atmospheres
- EN 1.4301 acc. to EN 10088/AISI 304

P34675

C5-M Stainless steel AISI 316L

Indoor- and outdoor environments: Heavy industries, coastal and offshore areas, purifying plants etc.

- Very high (marine) environmental corrosion.
- Areas with almost permanent condensation and large quantities of airborne pollution. Atmospheres with high salt content.
- EN 1.4404 acc. to EN 10088/AISI 316L

Corrosion Classes

The life expectancy of a cable support system is dependent on the environment in which it is placed. Therefore, it is important to establish the corrosive properties of an environment to ensure that the right treatment and the right material are chosen. Do not use components finish above of the corrosion class targeted. The table below shows various corrosion classes. As a guide, we have included the surface treatment recommended by Wibe Group for the different classes.

On the next page, we briefly outline the various surface treatments and materials. As regards environmental corrosion, a steel design component can usually be assigned to one of the corrosion classes (C1 to C5-M) as shown in table A. Reference values for the average level of corrosion in steel and zinc are given in table B. The corrosion classes comply with those stipulated in SS-EN ISO 12944-2.

Table A

Corrosion classes as stipulated by SS-EN ISO 12944-2 with atmospheric corrosion levels and examples of the environment in which they are most suitable for use.

Corrosion class	Environmental corrosion	Examples of typical environments in temperate climates (informative)		Wibe Group designation
		Outdoors	Indoors	
C1	Very low	–	Heated areas with arid atmosphere and insignificant quantities of pollutant, e.g. offices, shops, schools and hotels.	Electro-galvanized DIN 50961/ISO 2081
C2	Low	Atmospheres with low levels of airborne pollution. Rural areas.	Non-heated areas with fluctuating levels of temperature and humidity. Few instances of condensation and low levels of airborne pollution, e.g. sports halls and warehouses.	Pre-galvanized Z 275 in accordance with EN 10346
C3	Average	Atmospheres containing some salt or average levels of airborne pollution. Urban and light industrial areas. Areas affected by coastal conditions.	Areas with average levels of humidity and some airborne pollution resulting from production processes, e.g. breweries, dairies, laundries.	Hot-dip galvanized after manufacture in accordance with EN-ISO 1461
C4	High	Atmospheres with average salt content or discernible levels of airborne pollution. Industrial and coastal areas.	Areas of high humidity and considerable airborne pollution as the result of production processes, e.g. chemical plants, swimming pools and dockyards.	Zinc+coating
C5-I	Very high (industrial)	Industrial areas with high levels of humidity and aggressive atmospheres.	Areas with almost permanent condensation and large quantities of airborne pollution.	
C5-M	Very high (marine)	Coastal and offshore areas with high salt content.	Areas with almost permanent condensation and large quantities of airborne pollution.	Zinkpox® HDG+powder coating Stainless steel EN 1.4301/AISI 304 Stainless steel EN 1.4404/AISI 316L

Table B

Mass losses for steel and zinc in various corrosion classes

Corrosion class	Mass loss per surface unit and thickness reduction (1 year of exposure) ¹			
	Steel		Zinc	
	Mass loss (g/m²)	Thickness reduction (µm)	Mass loss (g/m²)	Thickness reduction (µm)
C1	≤ 10	≤ 1.3	≤ 0.7	≤ 0.1
C2	> 10 to 200	> 1.3 to 25	> 0.7 to 5	> 0.1 to 0.7
C3	> 200 to 400	> 25 to 50	> 5 to 15	> 0.7 to 2.1
C4	> 400 to 650	> 50 to 80	> 15 to 30	> 2.1 to 4.2
C5-I	> 650 to 1500	> 80 to 200	> 30 to 60	> 4.2 to 8.4
C5-M	> 650 to 1500	> 80 to 200	> 30 to 60	> 4.2 to 8.4

¹ Corrosion speed is generally higher when the material is first exposed

Surface treatments

Wibe Cable Ladders - Technical and material data

Specification

Cold formed steel:	DX5xD acc. to EN 10346, DC0x acc. to EN 10130, DD1x acc. to EN 10111
Structural steels:	S235 and S355 acc. to EN 10025-2 AISI 316L acc. to EN ISO10088-2
Density:	7.7-7.85 kg/m ³
Surface treatment:	• Pre galvanized (>20 µm): EN 10346 • Hot-dip galvanized (55-70 µm): EN ISO 1461 • Zinc+ (>25 µm): EN 10346 • Zinkpox, hot-dip galvanized (55-70 µm) + polyester coating, white RAL9010 • Pickled (Stainless steel), except KHZSP ladder range
Resistance to impact:	20 J (IEC 61537)
Temperature range:	From -40°C to +120°C.

Electro-galvanized

Products are manufactured in accordance with ISO 2081. Such products are intended for use only in warm, dry areas with negligible pollutant levels.

Pre-galvanized

Products are manufactured from Z 275 pre-galvanized sheet steel in accordance with SS-EN 10346. Under normal conditions, surface sections created during cutting and drilling will repair themselves, providing superb anti-corrosion protection.

Hot-dip galvanized

Wibe Group has one of the most modern hot-dip galvanization plants in the Nordic countries. The hot-dip process is continuous, guaranteeing a high and even quality. The manufactured products are hot-dip galvanized in accordance with EN-ISO 1461:2009 whilst nuts and bolts are hot-dip galvanized in accordance with SS-EN ISO 10684. This form of galvanization affords very good value-for-money anti-corrosion protection in atmospheres with a pH value of between 6 and 13. However, in acidic environments where pH levels fall below 6 and in alkaline environments where the pH value exceeds 13, the protective zinc layer breaks down relatively quickly. When cuts/perforations or other kind of operation that damage or remove coating in HDG items suitable to be installed in aggressive corrosion class, must be repaired with a zinc rich paint.

Zinc+

Zinc+ surface treatment for some accessories (EN 10346) with a metallic Zinc-based coating containing aluminium and magnesium that offers ultimate corrosion resistance in aggressive environments (e.g. chloride & highly alkaline). In many cases a good alternative to hot-dip galvanization. Excellent surface finish with self-repairing protection of cut edges (galvanic protection).

Zinkpox®

The Zinkpox® method involves applying a homogenous polyester coating to the zinc layer. Besides resisting light-initiated degeneration and weathering, this powder coating has excellent mechanical properties as regards impact resistance and adhesion. It is also resistant to most chemicals. Compared to hot-dip galvanizing, applying a polyester coating to the zinc layer more than doubles the service life of treated components. The zinc layer prevents the development of filiform corrosion. This might otherwise degrade the coating. Consequently, the polyester coating is subject only to atmospheric attack and thus protects the zinc layer. The certified coating plant that treats our components uses a modern and environment-friendly process. Before powder coating, the galvanized components undergo meticulous pre-treatment. This ensures superb adhesion. In addition to extremely good corrosion protection, the Zinkpox® method also offers a choice of colours. Powder coating is a very environment-friendly way of achieving a coloured surface. Because the coating contains no solvents, it has largely replaced solventbased liquid coatings. Where installations are visible, cable ladders and fittings can be finished in a coating that matches the surrounding décor.

Stainless steel

Products manufactured in accordance with AISI 304 acc. to ASTM / 1.4301 acc. to EN 10088-3 or /AISI 316L acc. to ASTM / 1.4404 acc. to EN 10088-3 are designed for use in highly aggressive environments, either indoors or outdoors, on industrial sites where there are high levels of potent airborne pollution such as in certain chemical industries, cellulose-related industries, refineries or artificial fertilizer factories, high humidity tunnels, etc. Stainless steel products are also ideal for use in environments where special hygiene requirements are in force, such as dairies, abattoirs, other food industries and pharmaceutical factories.

Stainless steel AISI 304 or AISI 316L

The deciding factor in choosing between stainless steel AISI 304 or AISI 316L is the aggressiveness of the environment in which it is to be used, and for this atmospheric chlorine content plays a significant role. Environments with a high chlorine content, coastal areas being a prime example, are aggressive and usually require the use of AISI 316L materials. When assessing the needs of factories, consideration should be given to the materials previously used to suspend equipment such as pipe tubing, and from this determine whether stainless steel AISI 304 or AISI 316L material is required.

To consider when installing Stainless Steel Cable Ladders

- 1. Transport/handling:** Make sure that no iron objects come into contact with the stainless steel products.
- 2. Storing:** Never store stainless steel products close to where iron products are machined, for example close to cutting and grinding operations
- 3. Welding:** Welding during installation should be avoided where possible. If welding must be performed, make sure that only methods suitable for stainless steel are used.
- 4. Tools:** When cutting or grinding, always use cutting wheels and grinding tools which are free from iron. Do not use tools that have been previously used for cutting or grinding products containing iron. When drilling, use an HSS-drill. To maximize the useful life of the drill, employ a cooling fluid during drilling. When installing, conventional assembly tools can be used. However, when using a nut tigh-tener, ensure that the thread is first lubricated to prevent jamming.

Never mix untreated or galvanized products with stainless steel.

- 5. Measures:** If a blue annealing appears when cutting, grinding or drilling, re-move it with pickling paste, making sure that the paste is then carefully washed away with water. If selective corrosion appears it can be removed by:
 - a) Washing away with water (high-pressure if possible).
 - b) Polishing with a cleaning cloth or a fine emery paper (wet or dry) and washing with water.
 - c) Grinding with a fine-grained wheel and washing with water.
 - d) Pickling with pickling paste, making sure that the pickling paste is then carefully washed away with water.
- 6. When using pickling paste or similar products, always study the safety code for the product prior to use.**

Installation regulations

Installation of cables on a cable ladder

The installation of cables on cable ladders lies within the IEC 60364-5-52 standard for power cable installation only. Because Wibe cable ladders have rungs which occupy less than 10% of the plan area under the cables, the installation is defined as cables in "free air". Cable spaces do not require any de-rating factor for installation.

Method of installation	Correction Factor C _g Number of circuits of multicore cables							
	2	3	4	5	6	7	8	9
Single layer multicore touching on ladder supports	0,87	0,82	0,80	0,80	0,79	0,79	0,78	0,78

Cables touching must be de-rated in accordance with the table below.

For installation of a combination of power and communication cables on a cable ladder the separating distances should be according to EN 50174-2, see table below.

Communication cable type	Number of power circuits (1-phase 20A, 230V)									
	1-3	4-6	7-9	10-12	13-15	16-30	31-45	46-60	61-75	>75
	Minimum separation distance (mm), see figure A below this table									
Category 5e/6 unshielded	20	40	60	80	100	200	300	400	500	600
Category 5e/6/6 _A shielded	10	20	30	40	50	100	150	200	250	300
Category 7 _A shielded	2	4	6	8	10	20	30	40	50	60

Minimum separation distance (mm), figure A

Recommended cable management

Recommended cable management on common cable ladder

The cables need to be fixed to the ladder or bundled

- Power cables
- Data cables
- Control cables
- Sensitive cables like instrumentation cables
- A Separation distance

No fixing or bundling needed.

Installation of cable ladder

Full design data is given according to EN 61537 in the Range part in this catalogue showing all maximum and recommended loadings. Graphs are given in this catalogue to show the deflection against loading for various support distances. Any support system which is supported at intervals and loaded will deflect between the support intervals. Test model II is used for all ladder ranges.

Installation recommendations for cable ladders

The cable ladders should be installed in such a way that, as often as possible, the cables can be laid directly in place rather than being pulled through. Ladders for current carrying cables along the ceiling should be installed in such a way that the distance from the top of the ladder to the ceiling is not less than 300 mm. The free vertical distance between parallel ladders shall be at least 200 mm. Ladders near walls should be installed with a minimum free distance of 50 mm to the wall, so that cables can pass between the ladders and the wall. Ladders along partition walls should be installed with a minimum free distance of 100 mm to the wall. Sharp edges and screw ends on ladders should be removed before the cables can be installed. Expansion bolts for the installation of brackets/fixings should be installed with such a distance between them, that the designated load for ladders will not be exceeded. When selecting the distance between cantilever arms or brackets/fixings, the bearing strength and designated load of the ladders must be taken into consideration.

Electro-magnetic compatibility EMC

Electromagnetic Compatibility

Wibe Group has performed measurements at EMC Services in Gothenburg regarding EMC requirements, report RE-10273-17181. The results show that the shielding performance of both incoming and emitted fields is good concerning Wibe cable ladders.

When correctly installed Wibe cable ladders products work as a protective earth structure. This means that Wibe Group products can be used to achieve good engineering practice in accordance with the EMC directive 2004/108/EG.

Recommended installation examples

Metal against metal connection
- the ultimate installation

Short double connection
- realistic installation

Not recommended installation examples

Single connection
- poor installation

Long double connection
- in best case EMC neutral

Potential balancing

Electrical continuity and earthing

The standard EN 61537 establishes that for cable ladders with electrical continuity characteristics (metal), this continuity should be guaranteed by means of an equipotential connection and one or several connections to earth in accordance with the use of the ladder system.

The impedance must not exceed:

- 50 mΩ through the joint.
- 5 mΩ x metre of cable ladders. (*)

(*) Currently this value is studied through document IEC/SC23A/WG12, CLC/TC213/WG-5 – 765. It will be changed to 50 mΩ x metre.

The metre length and joining systems for the different sections that Wibe Group has, as well as the joints of the different accessories supplied, comply with the electrical continuity test established in the aforementioned standard, guaranteeing the impedance

established. To guarantee these impedance values tightening torque values of no less than 5 Nm are recommended, always using the joints recommended for each ladder type, and taking sizes into account.

To guarantee a safe installation, Wibe Group recommends a proper earthing of all the elements that make up the system (sections and accessories), using the accessories designed specifically for this purpose.

Ensure that all connections are well fixed and proper values are matching according to local legislation

WIBE GROUP RECOMMENDS NOT TO USE THE LADDER AS EARTH OR NEUTRAL CONDUCTORS. Wibe Group IS NOT RESPONSIBLE OF ANY DAMAGE IF YOU USE ACCESSORIES FROM OTHER MANUFACTURERS.

Product		Ohm/m
Cable Ladder KHZSP without joint, pre-galvanized		0.00089
Cable Ladder KHZSP with Joint 21, pre-galvanized		0.00100
Cable Ladder KHZSP with Coupling 22, pre-galvanized		0.00160
Cable Ladder KHZ/KHSP without joint, hot-dip galvanized		0.00050
Cable Ladder KHZ/KHSP with Joint 21, hot-dip galvanized		0.00040
Cable Ladder KHZ/KHSP with Coupling 22, hot-dip galvanized		0.00073
Cable Ladder KHZV without joint, hot-dip galvanized		0.00038
Cable Ladder KHZV joined with Screw set M12, hot-dip galvanized		0.00039

Cable Ladder KHZV with Coupling 44, hot-dip galvanized		0.00043

Potential balancing

For pre-galv, hot-dip galv and stainless steel AISI 316L

Resistance testing of Wibe Cable Ladders has been performed and approved according to norm IEC61537 for cable ladders in pre-galv, Hot-dip galv and Stainless steel AISI 316L.

For zinkpox coating

Installation of cable ladders with Zinkpox coating

Take-off hook 47 is mounted with self-drilling screw 4.8x13

For installation of joints, couplings, junctions and bends self-drilling screw 4.8x13 and ground wire, cable area $\geq 10 \text{ mm}^2$, must be used.

Self-drilling screw 4.8x13 and ground wire, cable area $\geq 10 \text{ mm}^2$, are used for installation of Coupling 22.

Joint 21 is mounted with self-drilling screw 4.8x13 in the grounding holes. When joining KHZ ladders Joint 21 must be moved approx. 20 mm from centre.

Use and installation CLX³ Click suspension

CLX³ General information

Standards

CLX³ installation system is tested and following the classification according to the IEC 61537.

Usage of gloves

According to IEC 61537 it is always recommended to use protective gloves when handling and manipulating cable support systems.

Handling and storage

- Store in dry and covered places.
- Avoid moisture and pollutants.
- Do not remove the packing until installation.
- Take care when storing and handling so that the CLX³ components are well protected from damage.

CLX³ Pendant loading configurations

CLX³ pendant is primarily designed for installation of the CLX³ support system, but can also be used for T-bolt installation.

The system can be installed in different configurations:

- b Click direction **(1)**: the cantilever and the ceiling plate are in the same direction
- b T-bolt direction **(2)**: a cantilever is fixed with a T-bolt to the rail, in the opposite direction of the ceiling plate
- b T installation **(3)**: combination of the first 2 installations
- b Central suspension **(4)**: the pendant is completed by a central suspension bracket
- b T and central suspension **(5)**.

Fixation to the ceiling

Keyhole design

Keyhole design is facilitating easy mounting of the pendant to the ceiling by allowing the bolts to be pre-fixed before finally placing the pendant and tightening the bolts.

For concrete ceiling, use bolts type IMT38051.

For other bolts where bolthead is < 16 mm use washer u 16 mm.

One bolt fixation

For click direction installation of CLX³ Cantilever arm **(1)**, use a single bolt, in the outer hole position on the ceiling plate.

Two bolt fixation

For T-bolt suspension, central suspension, T installation and T and central suspension installation **(2)**, **(3)**, **(4)**, **(5)**, always fix the ceiling plate to the ceiling using 2 bolts.

Use the angle adaptor when the ceiling is not horizontal to level out the suspended pendant.

Use and installation CLX³ Click suspension

Pendant load calculation

To verify that the load applied to each pendant is within performance, it is necessary to calculate and consolidate the total **tensile load force** and the total **moment-force** on each pendant and for each cantilever and after that compare the calculated values with the defined loading limitations to ensure a safe installation.

Total tensile force **Ft** calculation method

This is calculated as the sum of all forces applied to the pendant from the weight of cables on the length material.

F_t (total load in N) = L (span or supports distance in meters) $\times$ q_{max} (load in kg/m) $\times 10$.

In case of several layers are installed on the pendant then the sum of the F_t tensile load from all layers shall be calculated.

Total momentum force **Mt** calculation method

This is calculated as the sum of all the torsion forces applied to the pendant from the weight of cables on the length material and the offset distance created by the cantilever arm.

M_t (momentum in N.m) = F_t (N) $\times$ d (distance between axis center and point load in meters)

“ d ” depends of the position of the length material on the cantilever arm.

The distance d can be different depending on installation method. When the length material is installed on the full width of the cantilever, use $d1$.

For length material that are installed at the outer end of the arm, use $d2$.

Model	PG	d1 (m)	d2 (m)
CLX ³ cantilever arm 200	CSU795647	0.140	NA
CLX ³ cantilever arm 300	CSU795648	0.190	
CLX ³ cantilever arm 400	CSU795649	0.240	0.340
CLX ³ cantilever arm 500	CSU795650	0.290	0.440
CLX ³ cantilever arm 600	CSU795651	0.340	0.490

In case of several layers are installed on the pendant then the sum of the M_t momentum force from all layers shall be calculated.

Ensure that the installation is designed so that $\textcircled{2}M_t$ and $\textcircled{2}F_t$ are under the limits.

Use and installation CLX³ Click suspension

CLX³ Pendant 24/48

Vertical piece with a perforated pattern to be used for installation of CLX³ cantilever arms or CLX³ central suspension adapter. The open side of the rail can be used for installation of cantilever arms and brackets together with T-bolt.

Can be joined to CLX³ Rail 24/48 with pendant joint 2FJ.

Model	PG	High (mm) A	Width (mm) B	Length (mm) C

CLX ³ pendant 24/48 1500 mm PG	CSU795638		

Use and installation CLX³ Click suspension**Pendant limits, torque and deflection**

In the diagram below it is possible to check if $\varnothing Mt$ is below the momentum limitation of the pendant (end of line). It is also possible to see the deflection on the pendant at max $\varnothing Mt$ and all values below.

Calculation example

For a cantilever size 600, full size ladder installation, 3 m span, load of 23 kg/m on a 1000 mm pendant.

1) $\varnothing F$: 3 m (span) $\times$ 23 kg/m (load) $\times$ 10 = 690 N will be the load for each pendant system.

2) $\varnothing Mt$: 690 (N) $\times$ 0.34 (m) = 234 N.m.

$\varnothing F = 690 \text{ N} \leq 2000 \text{ N}$ and $\varnothing Mt = 234 \text{ Nm} \leq 235 \text{ N.m.}$

3) Drawing of the lines on the graph: for 234 N.m, the deflexion on the pendant is **30 mm**.

Use and installation CLX³ Click suspension

Distance between rails and offset

CLX³ rail have a pitch between the patterns of 25 mm.

The support distance between the pendants should be at least than 1.5 m. If the length material can't be installed on the exact same level, the length material should be installed on the closest offset- pitch and never at more than 12.5 mm vertically from the previous pattern.

Cutting of the pendant or rail

Cutting of the rail or the pendant should be made at 8 mm under the last pattern needed, as the side marks are showing. This to assure that there is enough material below the bottom pattern to secure proper fixation of the cantilever arm.

Installation of the rail joint

CLX³ rails can be joined together with pendant joint 2FJ.

Place the joint on the rail in place, make sure the 2 top holes are in front of slots to install the included bolts and nuts.

Install the second rail as high as possible and install the other bolts and nuts.

Torque of the nuts
11 N.m.

Note: extending the pendant with the rail joint will decrease the load capacity of the pendant. For SWL information when extending the pendants, contact Technical support.

Use and installation CLX³ Click suspension

CLX³ Adjustable ceiling plate

Adjustable ceiling plate is used together with CLX³ pendant to allow for angle correction up to 25°. The adjustable ceiling plate is fixed to the CLX³ pendant with

4 screw set 22S to be ordered separately. The pendant can be fixed to the adjustable ceiling plate in both possible directions (1) and (2).

Model	PG	High (mm) A	Width (mm) B	Length (mm) C
CLX ³ adjustable ceiling plate PG	CSU795639	100	59	150

Installation of the adjustable ceiling plate

Fix the adjustable ceiling plate to the ceiling with 2 bolts.
(c-c: 100 mm).

Insert the pendant into the adjustable ceiling plate.

Fix the pendant to the adjustable ceiling plate with 4 bolt sets 22S and align the pendant to the vertical plane before tightening the bolts.
Recommended torque 20 N.m.

Use and installation CLX³ Click suspension

CLX³ Cantilever arm

The CLX³ cantilever arm is a screw-less cantilever that clicks into the pattern in the CLX³ pendant and rail. The cantilever arm is used to fix either the KHZSP ladder, the Defem mesh tray or the Stago height 60 trays. It can also be used for the Performa mesh trays together with fixation bolts.

Model	PG	High (mm) A	Width (mm) B	Length (mm) C	Height below ladder (mm) D
CLX ³ cantilever arm 200 PG	CSU795647	62	49	280	43
CLX ³ cantilever arm 300 PG	CSU795648	62	49	380	43
CLX ³ cantilever arm 400 PG	CSU795649	92	49	480	73
CLX ³ cantilever arm 500 PG	CSU795650	92	49	580	73
CLX ³ cantilever arm 600 PG	CSU795651	92	49	680	73

Cantilever arm size compatibility

The click pattern on the cantilever arm is in some cases fitting more than one ladder width to make it possible to avoid pillars or obstacles on the wall. See the table and illustration below.

The table also clarifies which cantilever arm to use for each with of Defem mesh tray.

Model	PG	Compatible ladder		Space to the offset ladder (mm)	Defem size compatibility
			(offset)		
		L1	L2	A	
CLX ³ cantilever arm 200 PG	CSU795647	200	NA	NA	220
CLX ³ cantilever arm 300 PG	CSU795648	300	NA	NA	320
CLX ³ cantilever arm 400 PG	CSU795649	400	200	232	420
CLX ³ cantilever arm 500 PG	CSU795650	500	200	332	520
CL X ³ cantilever arm 600 PG	CSU795651	600	300	332	620

Cantilever arms Safe Working Load (SWL)

SWL of the cantilever bracket

Model	PG	Safety working load as wall bracket (full width) (N)	Safety working load as wall bracket (end of the arm) (N)

CLX ³ cantilever arm 400 PG	CSU795649	1250	1000
CLX ³ cantilever arm 500 PG	CSU795650	1250	750
CLX ³ cantilever arm 600 PG	CSU795651	1000	700

Tested according to IEC 61537 standard.

Use and installation CLX³ Click suspension

Installation of cantilever arms

CLX³ cantilever arms are clicked to the CLX³ pendants and rails. Make sure to select a pattern allowing all hooks to grip and the full cantilever back to be supported by the rail. The horizontal wing must touch the rail.

Hold the cantilever close to the hooks and insert the hooks in the rail.

Press the cantilever until the horizontal/top surface touch the rail.

Press against the rail and pull it down until the locking lip go inside the slot in the rail.

Visually check that the cantilever arm is properly positioned and the locking lip is positioned inside of the slot of the CLX³ rail.

Apply caution with unintended upward movements as it can cause the cantilever arm to unlock and therefore be released from the rail.

Uninstallation of CLX³ cantilever arm using screwdriver

1 Fit the head of the screwdriver between the rail and the locking lip of the cantilever.

Use the screwdriver as a lever to **2** push the lip out of the rail. Deform the lip as little as possible and **3** push the cantilever up to be able to unhook the cantilever arm.

Before reinstalling a cantilever that has been removed after installation, make sure the lip is locking properly. If not, correct the lip to the initial position.

Use and installation CLX³ Click suspension

Installation of KHSZP ladders on cantilever arms

CLX³ cantilever arms are designed to fix KHZSP ladders without need of tools or bolts.

- 1** Insert the ladder on the rail side.
Pull it on the outside direction to lock this side in the lip.

- 2** Squeeze the free side of the ladder strongly down on the outer end of the cantilever until **3** the ladder overpasses the locking lip.

Visually check that the ladder is properly positioned, and the locking lip is positioned inside of the ladder profile.

Use and installation CLX³ Click suspension

Uninstallation of KHSZP ladder of cantilever arms

Remove the ladder from the cantilever arm, by using a flat screwdriver.

1 Fit the head of the screwdriver between the ladder and the top surface of the cantilever as in the picture. Use the screwdriver as a lever to pull out the ladder of the locking lip until the ladder snaps out.

After releasing the outer side of the ladder, **2** push the ladder in the direction of the rail to unlock the other side.

Use and installation CLX³ Click suspension

CLX³ Central suspension adapter

The CLX³ central suspension adapter is clicked together with the central suspension brackets to create a central suspension piece that can be clicked to the rail or pendant.

Model	PG	High (mm) A	Width (mm) B	Length (mm) C
CLX ³ Central suspension adapter PG	CSU795700	166	31	39

Installation of the Wall bracket

The Wall bracket is made to directly fix a Cantilever arm to a wall, without using a full-size rail. The Wall bracket doesn't reduce the SWL of the cantilever arm and the distance between the back of the cantilever and the wall is the same as with a rail.

The wall bracket can be fixed in two different ways:
With the keyhole (A) or with the lateral holes (B).

The keyhole design allows to pre-fix the bolt in the wall, before installing the bracket.

For concrete wall, use bolts IMT38051.

For non-concrete wall, M8 bolts with washer >Ø16 should be used.

For the lateral holes, the bracket should always be fixed with at least the two top Ø6mm holes (same height as the keyhole). The left and right bolts should be horizontally separated by 80mm (axis to axis).

Use and installation CLX³ Click suspension

CLX³ KHZSP ladder central suspension bracket

Bracket to be used for central suspension of KHZSP ladders. The bracket shall be used together with the CLX³ central suspension adapter.

Model	PG	High mm A	Width mm B	Length mm C
CLX³ KHZSP central suspension bracket 200 PG	CSU795655	37	78	185
CLX³ KHZSP central suspension bracket 300 PG	CSU795656	37	78	285
CLX³ KHZSP central suspension bracket 400 PG	CSU795657	37	78	385
CLX³ KHZSP central suspension bracket 500 PG	CSU795658	37	78	485
CLX³ KHZSP central suspension bracket 600 PG	CSU795659	37	78	585

Central suspension bracket	SWL symmetric load (N)
200	1500
300	1500
400	1500
500	1250
600	1200

Use and installation CLX³ Click suspension

Installation of adaptor to central suspension brackets

The CLX³ central suspension bracket is installed without tools by clicking it to the central suspension. The method is the same for Central suspension bracket ladder -mesh or -tray. In the illustration below, the CSB for ladder is used.

1 Insert the adaptor in the pattern on the central suspension bracket.

2 Press the pieces together and **3** slide the adaptor until the click lip of the adaptor passes over the locking lip of the central suspension bracket with a **4** click.

Visually check and secure that the adaptor is properly positioned, and the click lip has overpassed the locking lip.

Installation of central suspension adapters to the CLX³ rail

The CLX³ central suspension adapters is installed to the rail without tools, by clicking. To ensure proper installation a hooks must be inserted in the rail:

1 Push the central suspension piece until the hooks are fully inserted in the pattern and the surface touches the rail.

2 Press towards the rail and **3** pull down until the click lip.

4 Pass inside the slot in the rail.

Visually check and secure that the adaptor is properly positioned, and the click lip is properly positioned inside of the slot of the CLX³ rail.

Apply caution with unintended upward movements as it can cause the adaptor to unlock and therefore be released from the rail

Use and installation CLX³ Click suspension

Uninstallation of adapter from the CLX³ rail

CLX³ central suspension adapters can be removed, by using a flat screwdriver.

1 Fit the screwdriver's head in the slot of the adaptor.

Use the screwdriver as a lever to **2** gently release the click lip from the rail. Then **3** push the adaptor up to release the L hooks from the rail.

If the adapter needs to be reinstalled, correct the click lip to the initial position and make sure the click lip is locking properly.

Uninstallation of adapter from central suspension brackets

CLX³ central suspension brackets can be removed, by using a flat screwdriver.

1 Hold the bracket, fit the screwdriver's head between the adaptor lip and the bracket.

2 Twist the screwdriver to use it as a lever on the click lip until it passes over the bracket's locking lip and **3** pull the adaptor sideways to release it.

When the bracket needs to be reinstalled, correct the click lip to the initial position and make sure the click lip is locking properly.

Use and installation CLX³ Click suspension

Installation of KHZSP ladders on central suspension brackets

CLX³ brackets are made to fix ladders KHZSP without tool.

1 Insert one inside side of the ladder on one lip of the bracket.

2 Pull up the other side and snap the ladder on the other lip.

Visually check if the bracket lip is inside the ladder profile. Profile clamp 43 can be used to fix the cable ladder to the support bracket.

Apply caution with unintended upward movements as it can cause the bracket to unlock and therefore be released from the rail

Uninstallation of KHZSP ladder from the central suspension bracket

KHZSP ladder can be removed from the bracket.

1 Push one side of the ladder up until the ladder leave the lip of the bracket.

2 Release the other side of the ladder from the lip.

Use and installation

Joint 21, with screws or screwless

Joint to be used for straight, rigid joining of cable ladders, bends, junctions and risers. No extra earthing needed.

Joint 21 in stainless steel

Joint 21 screwless joint

Joint 9

Joint to be used for straight joining of cable ladders KHZ, KHZP and KHZPS. The teeth of the joint should face downwards. Under load, the ladders are prevented from slipping apart. If the joint is above a bracket, the teeth should face upwards.

Joint 9 is used in straight joints of KHZ, KHZP and KHZPS.

NOTE! The teeth shall face downwards as shown in the figure. Under load, the ladders are prevented from slipping apart. If the joint is above a bracket, the teeth should face upwards.

Use and installation

Dropper joint 32

Dropper joint used to form vertical branches in centre position under/on top of cable ladders.

To be used together with Riser 18 to form vertical branches under Cable ladder KHZ, KHZP, KHZSP, KHZSPZ+ and KHZPS.

May also be used together with Riser 18 to form vertical branches on top of Cable ladder KHZ, KHZP, KHZSP, KHZSPZ+ and KHZPS.

Joint 45

Joint to be fitted as a joining plate in a cut KHZV/KHZPV ladder.

Cable ladders can be joined using separate joints.
 - Cut the ends clean.
 - Place the joints outside the ladders and mark where the holes shall be drilled.
 - Drill 9 mm dia. holes.

- Insert the joint plates into the ladders and bolt them fast.

The holes are laterally displaced to avoid play in joints. If the ladders are mounted with arch pipes facing downwards, use holes 1 and 3.

If the ladders are mounted with arch pipes facing upwards, use holes 1 and 2.

Use and installation

Coupling 22

Coupling to be used for horizontal or vertical branches at any desired angle.

Coupling 22 is used for horizontal branching to the required angle. The cut length of the ladder ends determines the angle. Angle plate 33 is always recommended for horizontal branches. Use Profile protection 28P.

Coupling 22 is used to form vertical angles of the required size.

Coupling 22 is used to form vertical branches of the required angle. Mount Profile protection 28P. To be cut when required.

Use 4 Couplings 22 to form a horizontal bend in different angles. The cut lengths of the ladder ends determine the angle.

As an alternative at transition joining of KHZSP, KHZPS, KHZ and KHZP use 1 Joint 21 and 2 Couplings 22.

Vertical branching under the cable ladder with one part of Coupling 22 and plate screw.

Clamp 12 and one part of Coupling 22 can be used for branching under the cable ladder – allowing angles from 0 – 180°.

Use 2 Coupling 22 for vertical branching under the cable ladder. **Note!** The screw of Coupling 22 must be turned so that its head will be placed against the side profile of the cable ladder. Bend the coupling with a screwdriver.

Use and installation

Junction coupling 14

Junction coupling to be used for T- and X-junctions. Suitable for cable ladders KHZ, KHZP, KHZSP and KHZPS, all cable widths.

For T-junctions, use 2 Junction couplings 14.
For X-junctions, use 4 Junction couplings 14.
A bracket should be placed under the connecting ladder close to the connection. Profile protection 28P is recommended. To be cut to required length.

Coupling 44

Coupling to be used for horizontal coupling of cable ladders KHZV/KHZPV. Also to be used for branches and as an end connection against a wall.

Coupling 44 may be bent to the required angle in a vice, using an adjustable spanner or similar.

Use Coupling 44 as a drilling pattern on the cut ladder. Drill 9 mm dia. holes.

Assemble the cut and drilled ladders using M8x30 mm bolts. If the angle unit is mounted against a fixed joint plate use Screw set M12.

Angled cutting of the ladder ends determines the angle.

Straight branch.

Angled branch.

Use Coupling 44 as an end attachment for mounting ladders against walls or floors.

Coupling plate 48

Coupling plate to be used as a self-supporting vertical angle coupling of cable ladders KHZV/KHZPV. Assembled with 2 Screw set M12.

For self-supporting vertical angle adjustment use 2 Coupling plate 48 och 2 Screw set M12
Coupling plate 48/30°=25°-35°
Coupling plate 48/45°=35°-55°
Coupling plate 48/60°=55°-65°

V°	A mm	B mm
30	115	55
45	145	55
60	180	65

Use and installation

Horizontal coupling 20C/ Horizontal coupling bending 20C

Coupling to be used for horizontal connection of cable ladders KHZP 20C range. Four screws M8x30 and nuts are included.

Coupling for Bending 20C may be bent to the required angle in a vice, using an adjustable spanner or similar.

Use Coupling 44 as a drilling pattern on the cut ladder. Drill 9 mm dia. holes.

Assemble the cut and drilled ladders using M8x30 mm bolts. If the angle unit is mounted against a fixed joint plate use Screw set M12.

Coupling 51

Coupling to be used as a self-supporting vertical coupling of cable ladders KHZV/KHZPV.

Screw set M12 for installation on the cable ladder is to be ordered separately.

Rising. Adjustable from 10° to 90° gradually in steps of 20°.

Sloping. Adjustable from 10° to 90° gradually in steps of 20°.

Screw set to be used for all joints with cable ladders KHZV and KHZPV.

1. Install the plates on the ladder with Screw set M12.

2. Assemble the ladders in the centre hole with one of the included screws/nuts. Adjust to desired angle and fix the installation in one of the outer holes with screw/nut.

3. Move the nut in the centre hole to the opposite outer hole and tighten.

Vertical coupling 20C

Coupling to be used as a self-supporting vertical coupling of cable ladders KHZP 20C range. Adjustable from 10° to 90° gradually in steps of 20°. Two screws M12 and nuts are included.

Rising and sloping adjustable from 10° to 90° gradually in steps of 20°. Screw set M12 for installation on the cable ladder is to be ordered separately..

Screw set to be used for all joints with cable ladders KHZP 20C.

1. Install the plates on the ladder with Screw set M12.

2. Assemble the ladders in the centre hole with one of the included screws/nuts. Adjust to desired angle and fix the installation in one of the outer holes with screw/nut.

3. Move the nut in the centre hole to the opposite outer hole and tighten.

Angle plate 20C

Angled coupling to be used for cable ladders KHZP 20C range. Four screws M12x30 and nuts are included.

V	A mm	B mm
30	135	56
45	180	62
60	222	69

Use and installation

Profile clamp 42

Profile clamp to be used for installations where the cable ladder is to be fixed to cantilever arms, support brackets, etc. For mounting against wall use wall bracket 11.

Use Profile clamp 42 for attaching KHZSP, KHZPS, KHZ and KHZP to Cantilever arm 50 and Support bracket 3.

For installation of KHZSP, KHZPS, KHZ and KHZP on Support bracket 3, Profile clamp 42 is used.

To lock Angle plate 33/2, fit 2 Profile clamp 42.

Cable ladders can be mounted directly on Vertical piece 20 or 20F with Profile clamp 42. Use T-bolt for mounting. Convenient at vertical installations in shafts.

Profile clamp 43

Use Profile clamp 43 to attach KHZV/KHZPV to Cantilever arm 50.

Pendant/Fixing rail 24/48, mounted under Cable ladder KHZV with Profile clamp 43, here used as carrier of lighting fittings.

Profile clamp 20C

Profile clamp for KHZP 20 range to be used for installations where the cable ladder is to be fixed to cantilever arms, I-beams, etc. Slot for screw locking 9 x 24 mm.

Use and installation

Clamp 12

Clamp to be used on the side profile of the cable ladder for installation of accessories.

Type	A mm
Clamp12/70	125
Clamp 12/120	175

Clamp 12 can be used for installation of antenna brackets, junction boxes and so on. Bolt and nut included.

Profile clamp 41

Profile clamp to be used to install a pendant/fixing rail or mounting plate, etc., on the cable ladder profile.

Mounting of pendant/fixing rail on ladder profile Use Screw set 22S.

Installation of mounting plate for apparatuses. Use Screw set 22S.

Mounting of cable ladder on floor pendants. Use T-bolts against the opening of the fixing rail.

Mounting of cable ladders on wall pendants, such as in shafts. Use T-bolts against the opening of the fixing rail.

Profile support piece 46

To be fitted between the ladder and the vault pipe when a support bracket is positioned between existing profile support pieces. For cable ladders KHZV and KHZPV.

If a support bracket is placed between two profile support pieces, a Profile support piece 46 must be mounted between the arch pipes and the ladder. If the load is half the permitted load, exclude the Profile support piece 46.

Profile support piece 46 can be installed as a fixing for different applications.

Cantilever arm 30

Cantilever arm for installation inside cable ladder KHZSP.

Cantilever arm type	A mm
30/200	184
30/300	284
30/400	384
30/500	484
30/600	584

Installation of cable ladder KHZSP. Place the ladder on the outer tab and press it over the inner tab. When necessary, the ladder can be locked with a Profile clamp 43.

Installation on Vertical piece 2F. Cable ladder KHZSP can be adjusted max 40 mm.

Installation direct on wall. Cable ladder KHZSP is adjustable from 0-15 mm to the wall.

Breaking load for cantilever arm on wall, see table below.

When you mount cable ladders that are 500-600 mm wide it might be necessary with a reinforcement of the outer edge of the cantilever arm
Installation band and stretching screw can be used for mounting in the ceiling or on a vertical piece.

Breaking load					
Cantilever arm type	Max. load F on cantilever arm at a deflection of 3°		Deflection at 3° deflection of cantilever arm mm	Breaking load	
	kN	kg		kN	kg
30/200	2.0	200	10	2.3	230
30/300	1.9	190	15	3.5	350
30/400	1.2	120	20	3.0	300
30/500	0.8	80	26	2.4	240
30/600	0.6	60	31	2.0	200

3° is equivalent to 1/20xcantilever width, according to IEC 61537.

Use and installation

Cantilever arm 50i

Cantilever arm to be used for lighter mountings on walls, vertical pieces or pendant/fixing rails.

Cantilever arm type	Size		
	L mm	H1 mm	H2 mm
50i-200	250	85	28.5
50i-300	350	110	33.5
50i-400	450	115	31.0
50i-500	550	150	31.0
50i-600	650	150	31.0

Widths = 100

Widths = 200

Widths = 300

Widths = 400

Widths = 500

Widths = 600

Use and installation

Installation of cantilever arm mounted to wall using Expansion bolt M8. Breaking load - See table below.

Installation of cantilever arm using T-bolt M8 on Fixing rail 24/26 x 53 for casting-in or Pendant/ Fixing rail wall mounted.

Installation of cantilever arm using T-bolt M8 on vertical piece. Check breaking load of the vertical piece.

Cable ladder KHZSP mounted on Cantilever arm 50i, Profile clamp 42 is used.

Breaking load F - Mounted on wall		
Type of cantilever arm	kN	kg
50i-100	2.3	230
50i-200	2.15	215
50i-300	2.2	220
50i-400	2.35	235
50i-500	3.0	300
50i-600	3.0	300

Safe working load according to IEC 61537 is breaking load divided by 1,7.

Use and installation

Cantilever arm 50 and 50F

Cantilever arm for mounting on walls, pendant/fixing rails or vertical pieces.

Cantilever arm 50

Cantilever arm 50F

Cantilever arm 50

50/100-300

50/400-600

50/700-1000

Cantilever arm 50F

50F/200-600

50F/1000

Installation of a cantilever arm to a wall using an Expansion bolt. Breaking load – see on next page.

Installation of a cantilever arm using a T-bolt on a Fixing rail 24/26 x 53 rail for casting-in or Pendant/Fixing rails mounted on the wall. Breaking load – see on next page.

Mounting a cantilever arm using a T-bolt on a Pendant/Fixing rail mounted on a wall.

Installation of cantilever arm using T-bolt with vertical pieces. Breaking load – see on next page. Also check breaking load of the vertical piece.

Use and installation

Profile clamp 43 is used for attaching a KHZV onto a Cantilever arm 50F.

For attaching a KHZSP, KHZ, KHZPS or KHZP cable ladder, mount Profile clamp 42. If it is only necessary to fix the cable ladder at the outer end of the bracket, use self-tapping sheet screws or suchlike with 5 mm dia. holes in the bracket and in the side section.

Cantilever arm 50F mounted upside down can be used for installation of tilted protective roofs.

Use Cantilever arm 50/700-1000 as support when cable ladders have to pass columns etc.

Size and Breaking load F

									
Type	A mm	D mm	F mm	H mm	T mm	Mounted on wall		Mounted on P/F rail 24/48 with T-bolt 26U	
						kN	kg	kN	kg

50F/1000	1052	14	160	240	12	11.0	1100	8.0	800 (2)

Safe working load according to IEC 61537 is breaking load divided by 1.7.

(1) Stainless steel: 50/250-300 T = 4 mm, 50/400-600 T = 5 mm.

(2) Need to fix the cantilever 50F/1000 with two T-bolts, both upper and lower holes in the backplate.

Use and installation

Back plate 40

Back plate to be used for installation behind Cantilever arm 50 to reduce the surface pressure on porous walls.

Mount Back plate 40 as shown in the illustration to reduce the surface stress on porous walls.

By using Back plate 40, a cantilever arm can be mounted on the side of Vertical piece 20F.

Mounting rail 40

Mounting rail to be used for wall installation of cantilever arms on porous walls to reduce the surface pressure or to enable height adjustment of cantilever arms.

Mounting rails reduce the surface stress on porous walls. Mount the cantilever arm using T-bolt, which permits height adjustment.

Cables may be mounted on walls using Mounting rail 40 and a suitable Cable clamp ARX.

Use and installation

Wall support

Wall support for mounting of cantilever arm on porous walls or sandwich wall blocks, with six keyholes for easy fixation. When mounting cantilever arm on support, use screw set 22S (M8).

Two wall support plates can be combined with pendent rail 24/48 for extended mounting. for monting of pendent rail use screw set 22S.

Use and installation

Support bracket 3

Support bracket to be used for centre installation of cable ladders on pendant/fixing rails and vertical pieces.

Use and installation

Mount Support bracket 3 on Vertical piece 2 with Screw set 22S.

Mount Support bracket 3 on Vertical piece 2F with Screw set 22S.

Mount Support bracket 3 on Vertical piece 20 with Screw set 20S.

Mount Support bracket 3 on Vertical piece 20F with Screw set 2S.

Mount Support bracket 3 on Pendant/Fixing rail 24/34 with Screw set 22S.

Mount Support bracket 3 on Pendant/Fixing rail 24/20 or 24/48 with Screw set 22S.

Support bracket 3 installed on Pendant/Fixing rail 24/20F with Screw set 2S.

Support bracket 3 can be mounted on floor or under data floor with a suitable vertical piece.

For installation of KHZSP, KHZ, KHZPV and KHZPS on Support bracket 3 Profile clamp 42 is used.

When attaching KHZV/ KHZPV to Support bracket 3, use Profile clamp 42.

When attaching Support bracket 3 using clamp set M6 the tab must be bent up using a hammer or pair of pliers.

Support bracket 3 mounted on a rock bolt with Clamp set M6.

End bracket HT-11 permits the mounting of crossing cable ladders at different levels on the same pendant/fixing rail.

Use and installation

Support bracket 6

Support bracket to be used for centre installation of cable ladders KHZSP.

Size

Type	A mm
Support bracket 6/200	170
Support bracket 6/300	270
Support bracket 6/400	370
Support bracket 6/500	470
Support bracket 6/600	570

Breaking load for Support bracket 6 – symmetrical loading

Support bracket	Breaking load with Threaded rod W76 M10		Breaking load with Pendant attachment W21	
	kN	kg	kN	kg
6/200	5.0	500	3.4	340
6/300	4.8	480	3.4	340
6/400	3.0	300	3.0	300
6/500	2.2	220	2.2	220
6/600	1.7	170	1.7	170

Support bracket 6 must be mounted inside cable ladder KHZSP.

Support bracket 6 mounted with Threaded rod W76 M10. Nut M10 must be used.

Support bracket 6 mounted with Pendant rail W32, Pendant attachment W21 and Screw set W37 from the Wibe Cable Tray range.

Profile clamp 43 can be used to fix the cable ladder to the support bracket.

Support bracket HSO

Support bracket to be mounted together with Threaded rod M10 or M16 for the installation of cable ladders.

Size		
Type	A mm	D mm
Support bracket HSO/150 M10	210	12
Support bracket HSO/200 M10	260	12
Support bracket HSO/300 M10	360	12
Support bracket HSO/400 M16	460	18
Support bracket HSO/500 M16	560	18
Support bracket HSO/600 M16	660	18

Washer HSO M16

Washer to be used for centered mounting with Support bracket HSO M16 and Threaded rod M16.

Support bracket HSO M10 installed with Threaded rod W76 M10.

Centered installation with Support bracket HSO M10, widths 150-300, Threaded rod W76 M10 and 2 Nuts M10.

Centered installation with Support bracket HSO M16, widths 400-600, Threaded rod M16, 2 Nuts M16 and Washer HSO M16.

Profile clamp 42 is used to attach the cable ladder to the support bracket.

Use and installation

Threaded rod B41 and W76 M8, M10

Used for installation of light cable ladders.

Diametre and Surface treatment	L= 1000mm	L= 2000mm	L= 3000mm
M8 EZ	W76	-	-
M10 EZ	-	W76	W76
M8 HDG	W76	W76	-
M8 AISI	B41	B41	-
M10 AISI	B41	B41	-

Joint nut M8, M10

Used for joining of Threaded rod.

Flange nut B43 M8, M10

Flange nut is mounted onto Threaded rods in order to lock support brackets and ceiling brackets.

Thread lock B50 M8, M10

Used for joining of Threaded rod.

Support bracket 6 mounted with Threaded rod. Flange Nut B43 must be used.

Use Joint nut when joining 2 pieces of Threaded rod.

Flange nut B43 is mounted onto Threaded rod in order to lock support brackets and ceiling brackets.

Thread lock B50 is used for the joining of Threaded rod. Max. permitted load=80kg.

Ceiling bracket TF-10 and TF-16

Ceiling bracket to be used for installation with Threaded rods.

Ceiling bracket TF-10 or TF-16 installed with Threaded rod M10 or M16.

Use and installation

Wall bracket 11/25 and 11/75

To be used for vertical or horizontal installations of cable ladders against a wall.

Type	A mm
Wall bracket 11/25	25
Wall bracket 11/75	75

Vertical mounting
(max. load - F)
Wall bracket 11/25:
300 kg (3 kN)
Wall bracket 11/75:
300 kg (3 kN)
When mounting against
a rung the max load is
500 kg (5 kN) for wall
bracket 11/25.

Horizontal mounting
(max. load - F)
Wall bracket 11/25:
250 kg (2.5 kN)
Wall bracket 11/75:
100 kg (1.0 kN)

Mount wall brackets
against walls using
Expansion bolts.

Pendant/fixing rails can
be mounted on cable
ladders using wall
brackets for mounting
equipment cubicles
etc.
Mount wall brackets on
Pendant/fixing rails
using
Screw set 22S.

Wall bracket 20

To be used at installation of Pendant/fixing rail 24/20 to ceiling beam or wall.

For cable ladder
install- ations along a
beam. Pendant/Fixing
rail 24/20 must be
mounted with 2 Wall
brackets 20 and 2
T-bolts 26U-30 placed
in the centre outlet.
This installation is also
used for fixing to wall.
Max vertical
load 700 kg (7 kN).

For cable ladder
install- ations across a
beam. Pendant/Fixing
rail 24/20 shall be
mounted with 2 Wall
brackets 20 and 2
T-bolts 26U-30 in the
side-outlets.

Wall bracket 20F

To be used at installation of Pendant/Fixing rail 20F to ceiling beam or wall.

Pendant/Fixing rail
24/20F must be
mounted with 2 Wall
brackets 20F and 2
T-bolts 26U-30 for
cable ladders along
beams. This installation
is also used for fixing
to wall. Max. vertical
load 700 kg (7 kN).

Use and installation

Vertical piece 2

Vertical piece to be used for installation of Support bracket 3, symmetrical loading. Not suitable for cable ladders KHZV and KHZPV. Can be joined to Pendant/fixing rail 24/34 with Pendant joint 2J.

Type	L mm
Vertical piece 2/300	279
Vertical piece 2/400	392
Vertical piece 2/500	504
Vertical piece 2/700	729
Vertical piece 2/1000	1022

Mount Vertical piece 2 using an Expansion bolt or a concrete screw.

Mount Vertical piece 2 on a Fixing rail 24/26x53 for casting-in using T-bolt 26U.

On Vertical piece 2, mount Support bracket 3 using Screw set 22S.

Vertical piece 2 can be joined to achieve the required length using Pendant/Fixing rail 24/34 and Pendant joint 2J.

Cantilever arm 50 can, using End bracket HT-11, be mounted at 90° to the pendant/fixing rail. Only for lightweight mounting, such as data cables.

In ceilings with trapezoidal profile sheeting, mount Vertical piece 2 as shown above.

Breaking load

Breaking load for Vertical piece 2 with a symmetrical loading = 1400 kg (14 kN). See also breaking load for support bracket 3.

On beams in ceilings. When the beam flange thickness does not exceed 13 mm, use Beam clamp 5BK-10 and T-bolt 26U/40. For flange thicknesses not exceeding 30 mm use Beam clamp 5BK-30 and T-bolt 26U/50.

End bracket HT-11 permits the mounting of crossing cable ladders at different levels on the same pendant/fixing rail.

Vertical piece to be used for lighter mountings with Cantilever arm 50i and Cable ladder KHZSP.

Type	L mm
Vertical piece 2Fi-300	272
Vertical piece 2Fi-500	497
Vertical piece 2Fi-750	722
Vertical piece 2Fi-1000	992

Technical drawing of a cable ladder assembly. The drawing shows a cross-section of the assembly. A cable ladder is mounted on a vertical piece labeled 'Vertical piece 2Fi'. The assembly is supported by a 'Gypsum board'. The drawing is labeled 'P135280'.

Vertical piece 2Fi can be used as carrier of gypsum boards in order to build in cable ladder passages.

Breaking load

Vertical piece 2Fi
mounted in the
outer hole. Breaking
load=100 kg (1 kN) at
symmetrical loading

Use and installation

Vertical piece 2F

Vertical piece to be used for installation of Support bracket 3 or Cantilever arm 50. Can be joined to Pendant/fixing rail 24/48 with Pendant joint 2FJ. Can be mounted from the ceiling or on the floor. Can also be installed as a cantilever arm on a wall.

Type	L mm
Vertical piece 2F/280	280
Vertical piece 2F/370	370
Vertical piece 2F/505	505
Vertical piece 2F/640	640
Vertical piece 2F/730	730
Vertical piece 2F/865	865
Vertical piece 2F/1000	1000
Vertical piece 2F/1500	1495

Mount Vertical piece 2F using Expansion bolt alt. Concrete screw.

On Fixing rail forecasting-in, mount Vertical piece 2F using T-bolt.

In ceilings with trapezoidal sheeting, mount Vertical piece 2F as shown above.

On beams in ceilings, mount Vertical piece 2F as shown in the figure above. When the beam flange thickness does not exceed 13 mm, use Beam clamp 5BK-10 and T-bolt 26U/40. For flange thicknesses not exceeding 30 mm use Beam clamp 5BK-30 and T-bolt 26U/50.

On Vertical piece 2F, mount Cantilever arm 50 using T-bolt.

On Vertical piece 2F, mount Support bracket 3 using Screw set 22S.

Vertical piece 2F can be joined to achieve the required length using Pendant/Fixing rail 24/48 and Pendant joint 2FJ.

Cantilever arm 50 can, using End bracket HT-11, be mounted at 90° to the pendant/fixing rail. Only for lightweight installation of data cable type and suchlike.

Cable ladders mounted on Vertical piece 2F and Support bracket 3 can be used for cable installations in raised access floors.

For installation on floor the cable ladders can be mounted with Vertical piece 2F, Profile clamp 41 and T-bolt.

End bracket HT-11 permits mounting of crossing cable ladders on different levels on the same pendant/fixing rail.

Use and installation

Breaking load symmetrical loading*

Breaking load for Vertical piece 2F (VP) = 2300 kg (23 kN) at symmetrical loading.

VP + Pendant bar for reduction of deflection

Deflection of Vertical piece 2F is reduced by installing Pendant bar 1. Loadings in accordance with chart below.

Breaking load asymmetrical loading

$$M = \sum F \times A$$

See also max loading for Cantilever arm 50 installed on pendant/fixing rail, page Cantilever arm 50L, 50 and 50F.

For values outside diagram please contact Wibe Group.

Example

Conditions:

- 2 m support distance.
- 10 kg/m ladder
- Two ladders, 200 and 300 mm
- One-side loading
- VP 2F/730
- Bending?

$$M = \sum F \times A \text{ (kgcm)}$$

$$M = 10 \times 2 \times \frac{(20 + 6.5)}{2} + 10 \times 2 \times \frac{(30 + 6.5)}{2}$$

$$(F_1) \quad (A_1) \quad (F_2) \quad (A_2)$$

M = 760 kgcm - bending as per diagram, about 5.5 mm.

Bending torque M is total sum of $F \times A$ (kgcm).

F = Cantilever arm loading (kg)

F = Loading (kg/m) x support distance (m).

A = Distance between loading and VP centre line (cm)

$$A = \frac{\text{Ladder width} + 6.5 \text{ cm}}{2}$$

L = VP length

Break load torque 6 000 (kgcm)

Loading table for Vertical piece 2F installed as a cantilever arm

	 Vertical piece 2F with Pendant bar 1/300	
Pendant type	2F/700	2F/1000
Ladder width	Breaking load	Breaking load
150	120	75
200	125	80
300	135	90
400	140	100
600	—	120

*Safe working load according to IEC 61537 is breaking load divided by 1.7.

Use and installation

Vertical piece 20

Vertical piece, two-sided, to be used for vertical installation together with Cantilever arm 50, from a ceiling or on a floor. Can also be installed as a cantilever arm on a wall.

Type	L mm
Vertical piece 20/280	280
Vertical piece 20/370	370
Vertical piece 20/500	505
Vertical piece 20/640	640
Vertical piece 20/700	730
Vertical piece 20/865	865
Vertical piece 20/1000	1000
Vertical piece 20/1500	1495
Vertical piece 20/2000	1990
Vertical piece 20/3000	2980

Mount Vertical piece 20 using Expansion bolt.

On fixing rail for casting-in, mount Vertical piece 20 using T-bolts.

In ceilings with trapezoidal profile sheeting, mount Vertical piece 20 as shown above

On beams in ceilings, mount Vertical piece 20 as shown in the figure above. When the beam flange thickness does not exceed 13 mm, use Beam clamp 5BK-10 and T-bolt 26U/40. For flange thicknesses not exceeding 30 mm use Beam clamp 5BK-30 and T-bolt 26U/50.

Vertical piece 20 can be joined to achieve the required length using Pendant/Fixing rail 24/20 and Pendant joint 20J.

Using End bracket HT-11, Cantilever arm 50 can be mounted at 90° to the pendant/fixing rail. Only for lightweight mounting of data cable type and suchlike

Vertical piece 20 is also suitable for floor mounting

Vertical piece 20 may be used for vertical mounting in a shaft, for example. Mount Wall bracket 11 or Profile clamp 42 using T-bolts. The vertical piece may also be mounted horizontally as a cantilever arm, such as when passing columns.

On vertical piece, mount Cantilever arm 50 using T-bolt. For loadings see Cantilever arm 50

On Vertical piece 20, mount Support bracket 3 using Screw set 20S.

Use and installation

Breaking load symmetrical loading*

Breaking load for vertical piece (VP)
= 3000 kg (30 kN).

Breaking load asymmetrical loading

$M = \sum F \times A$
See also max loading for Cantilever arm 50 installed on pendant/fixing rail, page Cantilever arm 50L, 50 and 50F.

Example

Conditions:

- 2 m support distance.
- 30 kg/m ladder
- Two ladders, 400 and 600 mm
- One-side loading
- VP 20/1000
- Bending?

$$M = \sum F \times A \text{ (kgcm)}$$

$$M = 30 \times 2 \times \frac{(40 + 7.7)}{2} + 30 \times 2 \times \frac{(60 + 7.7)}{2}$$

$$(F_1) \quad (A_1) \quad (F_2) \quad (A_2)$$

$M = 3924 \text{ kgcm}$ - bending as per diagram, about 6 mm.

Bending torque M is total sum of $F \times A$ (kgcm).

F = Cantilever arm loading (kg)

F = Loading (kg/m) x support distance (m).

A = Distance between loading and VP centre line (cm)

$A = \frac{\text{Ladder width} + 7.7 \text{ cm}}{2}$

L = VP length

Break load torque 19 000 (kgcm)

Loading table for Vertical piece 20 installed as a cantilever arm

	Vertical piece 20 with Pendant bar 1/300			Vertical piece 20 without pendant bar		
Pendant type	20/700	20/1000	20/1500	20/700	20/1000	20/1500
Width Ladder type	Breaking load	Breaking load	Breaking load	Breaking load	Breaking load	Breaking load
150	380	210	155	230	165	115
200	400	240	160	250	170	115
300	425	270	165	280	175	120
400	450	300	170	310	180	125
600	-	320	180	370	190	130

*Safe working load according to IEC 61537 is breaking load divided by 1.7.

Use and installation

Vertical piece 20F

Vertical piece, two-sided, to be used for mounting from the ceiling or on the floor. Suitable for rather heavy loads.

Type	B mm	C mm	L mm
Vertical piece 20F/1000	50	280	995
Vertical piece 20F/1500	70	195	1490
Vertical piece 20F/2000	5	195	1985
Vertical piece 20F/3000	70	280	2980

Floor mounting example.

Mount Vertical piece 20F using Expansion bolt alt. Concrete screw.

Cantilever arm 50 can be mounted using T-bolt. For loads on Cantilever arm 50, see Cantilever arm 50L, 50 and 50F.

Using End bracket HT-11, Cantilever arm 50 can be mounted at 90° to the vertical piece. Only for lightweight mounting of data cable type or similar.

Vertical piece 20F mounted on floor can be fixed using Vertical piece 2 as ceiling bracket, adjustable in the pendant.

Breaking load Symmetrical loading*

Breaking load for Vertical piece (VP) 20F = 5000 kg (50kN)

Breaking load asymmetrical loading

$M = \sum F \times A$
Vertical piece 20F mounted in ceiling, see diagram.

Example

Conditions:

- 2 m support distance 50 kg/m ladder
- Two ladders, 400 and 600 mm
- One-side loading
- VP 20F/1500
- Bending?

$$M = \sum F \times A \text{ (kgcm)}$$

$$M = 50 \times 2 \times \frac{(40 + 9.4)}{2} + 50 \times 2 \times \frac{(60 + 9.4)}{2}$$

$$M = 6880 \text{ kgcm - bending as per diagram, about 6 mm.}$$

Bending torque M is total sum of $F \times A$ (kgcm).

F = Cantilever arm loading (kg)

F = Loading (kg/m) x support distance (m).

A = Distance between loading and VP centre line (cm)

$$A = \frac{\text{Ladder width} + 9.4}{2}$$

L = VP length

Break load torque 30 000 (kgcm)

*Safe working load according to IEC 61537 is breaking load divided by 1.7.

Use and installation

Vertical piece 20FS

Vertical piece, two-sided, to be used for mounting from the ceiling or on the floor. Suitable for very heavy loads.

Type	L mm
VP 20FS/1500	1495
VP 20FS/2000	1990
VP 20FS/2500	2485
VP 20FS/3000	2980

End
plug 28F

Mount Vertical piece
20FS using Expansion
bolt alt Concrete screw.

Mount Cantilever arm
50 using T-bolt. For
loads on Cantilever
arm 50L, 50 and 50F.

Using End bracket HT-11,
Cantilever arm 50 can be
mounted at 90° to the
vertical piece. Only for
lightweight mounting of
data cable type or similar.

Breaking load Symmetrical loading

Symmetrical loading
Breaking load for
Vertical piece (VP) 20FS
= 5000 kg (50 kN)

Breaking load asymmetrical loading

Asymmetrical loading
 $M = \sum F \times A$ Vertical
piece 20FS mounted
in ceiling, see diagram.

Example

Conditions:

- 2 m support distance 75 kg/m ladder
- Two ladders, 400 and 600 mm
- One-side loading
- VP 20FS/1500
- Bending?

$$M = \sum F \times A \text{ (kgcm)}$$

$$M = 75 \times 2 \times \frac{(40 + 10.4)}{2} + 75 \times 2 \times \frac{(60 + 10.4)}{2}$$

$$(F_1) \quad (A_1) \quad (F_2) \quad (A_2)$$

$M = 10620 \text{ kgcm}$ - bending as per diagram,
about 5 mm.

Bending torque M is total sum of $F \times A$ (kgcm).

F = Cantilever arm loading (kg)

F = Loading (kg/m) x support distance (m).

A = Distance between loading and VP centre line (cm)

$$A = \frac{\text{Ladder width} + 10.4}{2} \text{ cm}$$

L = VP length

Break load torque 60 000 (kgcm)

*Safe working load according
to IEC 61537 is breaking load
divided by 1.7.

Use and installation

Pendant/Fixing rail 24/34

Pendant/Fixing rail for mounting of support brackets, cantilever arms, etc.

Type	L mm
Pendant/Fixing rail 24/34	292.5
Pendant/Fixing rail 24/34	382.5
Pendant/Fixing rail 24/34	495.0
Pendant/Fixing rail 24/34	697.5
Pendant/Fixing rail 24/34	990.0
Pendant/Fixing rail 24/34	2970.0

Vertical piece 2 may be joined to Pendant/Fixing rail 24/34 and Pendant joint 2J to achieve a suitable length.

Ceiling bracket 5 and 1 Screw set 22S together provide a vertical piece that can be mounted with up to 20° slope.

Mount Support bracket 3 using Screw set 22S.

Side mounting of pendant/ fixing rails may be done using 2 Expansion bolts alt. 2 Concrete screws.

Pendant/Fixing rail 24/48

Pendant/Fixing rail for mounting of support brackets, cantilever arms, etc.

Type	L mm
Pendant/Fix. rail 24/48	1000
Pendant/Fix. rail 24/48	2970
Pendant/Fix. rail 24/48	5940

Vertical piece 2F may be joined using Pendant/Fixing rail 24/48 and Pendant joint 2FJ to achieve the required length.

Ceiling bracket 5 and 1 Screw set 22S together provide a vertical piece that can be mounted with up to 20° slope. Only for mounting support brackets.

Mount Support bracket 3 using Screw set 22S.

Mount Cantilever arm 50 using T-bolt.

Cables are mounted on a Pendant/Fixing rail 24/48 using cable clamp ARX.

Use and installation

Pendant/Fixing rail 24/20

Pendant/Fixing rail for mounting of support brackets, cantilever arms, etc.

Vertical piece 20 may be joined using Pendant/Fixing rail 24/20 and Pendant joint 20J. Only for symmetrical loading.

Mount Cantilever arm 50 using T-bolts.

Mount Support bracket 3 using Screw set 20S.

Pendant/Fixing rail can be mounted on beam or wall with Wall bracket 20.

Pendant/Fixing rail 24/20 may be mounted as a riser between the floor and ceiling using 4 Angle brackets 5L and 4 T-bolts.

Cable ladder may be mounted vertically or horizontally on Pendant/Fixing rail 24/20 using Wall bracket 11/25 or 11/75 and T-bolt.

Pendant base plate 520 can be mounted as a ceiling or floor attachment.

Use and installation

Pendant/Fixing rail 24/20F

Pendant/Fixing rail for mounting of support brackets, cantilever arms, etc.

Mount Cantilever arm 50 using T-bolts.

Mount Support bracket 3 using Screw set 2S.

Pendant/Fixing rail 24/20F can be mounted on beam or wall with Wall bracket 20F

Type	L mm
Pendant/Fixing rail 24/20F-3000	2970
Pendant/Fixing rail 24/20F-6000	5940

Pendant/Fixing rail 24/20F can be mounted as a riser between the ceiling and floor using 4 Angle brackets 5L and 4 T-bolts.

Mount Pendant/Fixing rail 24/20F between a floor and ceiling using 2 Rail fixing supports.

Cable ladder can be mounted vertically or horizontally on Pendant/Fixing rail 24/20F using Wall bracket 11/25 or 11/75.

Pendant/Fixing rail 24/20FS

Pendant/Fixing rail for mounting of support brackets, cantilever arms, etc.

Mount Cantilever arm 50 using T-bolts.

Pendant/Fixing rail 24/20FS can be mounted as a riser between the ceiling and floor using 4 Angle brackets 5L and 4 T-bolts.

Mount Pendant/Fixing rail 24/20FS between floor and ceiling using 2 Rail fixing supports.

Cable ladders can be mounted vertically or horizontally on Pendant/Fixing rail 24/20FS using Wall bracket 11/25 or 11/75 and T-bolt.

Use and installation

Fixing rail 24/26x53 for casting-in

Fixing rail for casting-in in wall and ceilings.

Fixing rail 24/26 x 53 for casting-in in walls and ceilings. Mount cantilever arms with T-bolt 26U.

Max. pull-out load: 1000 kg/0.5 m of casting-in fixing rail (Concrete class K200).

Ceiling plate 20F

Ceiling plate to be used as a pre-drilled attachment for Vertical piece 20F to a steel member. The ceiling plate is welded in position.

The ceiling plate is welded to the steel member. Permission to weld on the steel member is required. Remove all zinc at the weld. Post-treat using Galvafröid.

Use Ceiling plate 20F as a fully drilled attachment for Vertical piece 20F against a steel member. Secure the ceiling plate by welding. Remove all zinc at the weld. Post-treat using Galvafröid.

Ceiling plate 20FS

Ceiling plate 20F is used as a pre-drilled attachment for Vertical piece 20F to a steel member. The ceiling plate is welded in position.

The ceiling plate is welded to the steel member. Permission to weld on the steel member is required. Remove all zinc at the weld. Post-treat using Galvafröid.

Use Ceiling plate 20FS as a fully drilled attachment for Vertical piece 20FS against a steel member. Secure the ceiling plate by welding. Remove all zinc at the weld. Post-treat using Galvafröid.

Use and installation

Pendant base plate 520

Pendant base plate to be used as a ceiling or floor base plate for Pendant/Fixing rail 24/20 in any desired length.

Vertical pieces of the required length can be mounted using Pendant base plate 520 and Pendant/Fixing rail 24/20.

Rail fixing support 24/20F, 24/20FS

Rail fixing support to be used with Pendant/fixing rails 24/20F and 24/20FS respectively, for mounting between floor and ceiling.

Type	A mm	B mm	C mm
Rail fix. support 24/20F	100	165	135
Rail fix. support 24/20FS	120	185	155

1. Mount one of the rail fixing supports in the ceiling.
2. Adjust the pendant length.
3. Mount the rail fixing support for floor mounting on the pendant.
4. Insert the pendant in the rail fixing support in the ceiling.
5. Attach the bottom rail fixing support securely to the floor.

Ceiling bracket 2Fi

Ceiling bracket to be used on Pendant/fixing rail 24/48 to achieve the desired length of vertical pieces.

Ceiling bracket 2Fi and Pendant/Fixing rail 24/48, mounted together with 2 Screw sets 22S, are used when other lengths are required than those available for Vertical piece 2Fi.

Use and installation

Pendant bar 1

Pendant bar to be installed in order to reduce the deflection of heavily loaded vertical pieces. Installed with T-bolt and Expansion bolt.

Pendant bar 1/300-800 Pre-galv.

Pendant bar 1/300-800 Hdg

Pendant bar 1-1500 Hdg

Type	A mm'	A mm	B mm
1/300	40	80	300
1/500	40	130	500
1/800	125	215	800
1/1500	Varies	Varies	Varies

Pendant bar 1

To reduce deflection of Vertical piece 2Fi at heavy loads on Cantilever arm 50i the Pendant bar 1 can be used. Install with T-bolt and Expansion bolt.

Pendant bar 1/300-800

To reduce deflection of Vertical piece 2F at heavy loads on Cantilever arm 50 the Pendant bar 1 can be used. Install with T-bolt and Expansion bolt.

Expansion bolt
T-bolt

To be mounted to strengthen Vertical piece 20 when mounted horizontally. Use T-bolt and Expansion bolt.

Bend on site to required angle
Pendant bar 1-1500
T-bolt

Mount this stay to reduce deflection of long Vertical pieces 2F, 20 and 20F.

Pendant joint 2J, 2FJ and 20J

Pendant joint to be used for joining pendant/fixing rails and vertical pieces.

Pendant joint 2J

Pendant joint 2FJ

Pendant joint 20J

Pendant joint 2J, used for joining of Vertical piece 2 and Pendant/Fixing rail 24/34.

Pendant joint 2FJ, used for joining of vertical piece 2F.

Pendant joint 20J, used for joining of Vertical piece 20 and Pendant/Fixing rail 24/20. Only for symmetrical loading.

Use and installation

Angle bracket 5L and 5LS

Angle brackets used when assembling pendant/fixing rails to frames for switching cabinets and electrical control centres and for fixing an upright between floor and ceiling. Assembled with a T-bolt. Angle bracket 5L is also used for steel wire installation in ceilings.

Angle bracket 5L

Angle bracket 5LS

Angle bracket 5L

Angle bracket 5LS

Installation examples for installation of pendant/fixing rails to different frameworks for installation of control panels, electric distribution boards, etc. Angle bracket 5L is used.

Mounting of a pendant/fixing rail on a wall. Use Angle bracket 5L or 5LS.

Mounting of a pendant/fixing rail against floor with Angle bracket 5L or 5LS.

Angle bracket 5L can be mounted inside the ladder profile and thus be used as an end connection against wall or floor.

Angle bracket 5L is installed in ceiling with Expansion bolt or concrete screw. Max. permitted loading 600 kg (6 kN).

5LS can also be mounted as support behind pendant/fixing rails to compensate for irregularities in, for example, concrete or mountain walls.

Use and installation

Combi bracket 53

Combi bracket to be used for the mounting of cable ladders and trays on seamed roofing sheets, etc. To be combined with plastic insulating plate 54.

Breaking load*

	Type of roofing sheet	Insulating plate	Permitted load
	Bandsheet Prelac	No	F1=100 kg
	Copper sheeting	Yes	F2=50 kg
	Bandsheet Prelac	No	F3=100 kg
	Copper sheeting	Yes	F4=50 kg

* Loading values and fixing of roof sheet - follow the supplier's recommendations

Test have been made of:

Bandsheet Prelac BLX t=0.6 SSAB tunnplåt Copper sheeting annealed SS 5015-80 t=0.6 Tightening torque at test=60Nm

Combi bracket 53 mounted on seamed roofing sheet.

Alternative mounting of Combi bracket 53.

In order to avoid contact between Combi bracket 53 and copper sheeting, Insulating plate 54 must be used.

Alternative mounting of Combi bracket 53 and Insulating plate 54.

Cable ladder mounted across the seams of the roofing sheets with Combi bracket 53, Wall bracket 11/25 and Screw set 22S.

Cable ladder mounted along the seams of the roofing sheets with Combi bracket 53, Wall bracket 11/25, Screw set 22S, Pendant/Fixing rail 24/48 and T-bolt 26U.

Mesh tray mounted along the seams of the roofing sheets with Combi bracket 53 and accessories from the Mesh tray programme.

Mesh tray mounted across the seams of the roofing sheets with Combi bracket 53 and accessories from the Mesh tray programme.

Bracket 60/40

Bracket to be used together with Pendant/fixing rail 24/48 to reduce the deflection of long vertical pieces.

Use Bracket 60/40 together with Pendant/Fixing rail 24/48 to reduce the deflection of long Vertical pieces 2F, 20, 20F or 20FS. Cut the pendant/fixing rail to a suitable length on site.

Use and installation

Rod bracket 82

Rod bracket to be used together with Cantilever arm 50, in combination with threaded rod support.

Rod bracket 82 mounted on Cantilever arm 50. Screw set 22S and Profile clamp 42 are to be used.

Ceiling bracket 5

Ceiling bracket to be used for installations with Pendant/Fixing rails 24/34 and 24/48.

Using Pendant/Fixing rail 24/34 or 24/48, 1 Ceiling bracket 5 and 1 Screw set 22S it is possible to make a vertical piece that can be installed at an angle of up to 20°. Breaking load for rail 34 = 1000 kg (10 kN). Breaking load for rail 48 = 1200 kg (12 kN).

Mount Ceiling bracket 5 to the back of the pendant/fixing rail by turning the ceiling bracket 90° and inserting the tab into the hole in the rail. Then turn the ceiling bracket back and lock it in the required position using 1 Screw set 22S. When mounting it at a horizontal ceiling, lock the screw in the slot recess for better lateral stability. Ceiling bracket 5 can be tilted max. 20°.

Pendant/Fixing rail 24/20 can, using 2 Ceiling brackets 5 and 2 T-bolts, be mounted between floor and ceiling (see also Angle bracket 5L).

Pendant/Fixing rail 24/20F can, using 4 Ceiling brackets 5 and 4 T-bolts, be mounted between floor and ceiling (see also Angle bracket 5L).

Use and installation

Ceiling bracket 5TPA

Ceiling bracket with telescopic function, to be used for mounting of various sizes of trapezoid plates.

Ceiling bracket 5TPA can be mounted in trapezoid plate with blind rivets or suitable screws. The bracket is adjustable from 35 to 95 mm.

Pendant attachment W21 or Tube pendant attachment W73 (Wibe Cable Tray) can be mounted in Ceiling bracket 5TPA with the existing screw.

Ceiling bracket 5 or Ceiling attachment W31 can be mounted with the existing screw.

Breaking load

Ceiling bracket 5TPA can be loaded with $F=150$ kg without deformation. For loading figures for thin plate or fixing elements, follow suppliers recommendations.

Vertical piece 2 or 2F can be mounted with the existing screw.

Install Mounting rail 40 between 2 Ceiling brackets 5TPA if the vertical piece must be adjusted sideways.

Pendant W76 M8 or M10 installed in Ceiling bracket 5TPA.

Ceiling bracket 5TP

Ceiling bracket to be used in trapezoidal sheeting for installations of Pendant/Fixing rail 24/48.

In ceilings with trapezoidal sheeting, mount Vertical piece 2, 2F or 20 using 2 Ceiling brackets 5TP, Pendant/Fixing rail 24/48, 2 T-bolts and Screw set 22S.

Alternatively Pendant/Fixing rail 24/20 may be used. This will require the use of 4 T-bolts.

Use and installation

Fixed take-off hook 4

Fixed take-off hook to be used for 90° horizontal branches.

5 mm dia. hole for any locking against the ladder profile using sheet screws or blind rivets

Fixed take-off hook 4 is used at 90° horizontal branches. Coupling 22 can also be used for straight angle formation.

KHZSP, KHZSPZ+, KHZPS,
KHZ and KHZP can also be
used to form 90° angles
from KHZV/KHZPV using
Fixed take-off hook 4.
Mount Profile protection
28P

5 mm dia. hole for any locking against the section using sheet screws or blind rivets.

Angle plate 33 is always recommended at horizontal branches.

Take-off hook 47

Take-off hook to be used on cable ladders KHZV and KHZPV to make 90° branches.

Use Take-off hook 47
to make 90° branches.

The extra hole, Ø 4.5, is to be used when earthing is demanded or if vertical locking of the ladder is needed. A self-drilling screw must be used.

Take-off hook 20C

Take-off hook to be used on cable ladders KHZP 20C range to make 90° branches. Screw M12 and nuts are included.

Use Take-off
hook 20C to make
90° branches.

The extra hole, Ø 4.5, is to be used when earthing is demanded or if vertical locking of the ladder is needed. A self-drilling screw must be used.

End connection 10

End connection to be used for the connection of a ladder vertically to a floor, or horizontally to a wall.

The End connection 10 is mounted at the ladder end vertically against floors or horizontally against walls.

Mount the End connection 10 using Expansion bolts.

Max. tilt permitted =
3 mm before
tightening the screw.

Use and installation

Combi Fitting B21

Combi-fitting to be used when mounting mesh trays onto cable ladders.

Defem Mesh tray 53 and 75 is mounted onto Combi Fitting B21 with Bracket B4 mini Bolt and Nut B13.

Defem Mesh tray 120 is mounted onto Combi Fitting B21 with Bracket B4 Bolt and Nut B13.

Combi Fitting B21 90 degree

Combi-fitting to be used when mounting mesh trays onto cable ladders.

Defem Mesh tray 53, 75 and 120 is mounted onto Combi Fitting B21 90° with 1 Fitting B2.1 Bolt and Nut B13.

Junction box plate 35S

Installed upright or hanging from the profile. Locked with locking tabs.

B223560

Bend the tab towards the ladder section by using a screwdriver as a lever for mounting junction box plates.

Junction box plates can be mounted in standing or hanging positions on the side sections. Strain-relief may be provided using the outermost holes and clamps or strips.

Light fittings can also be mounted on junction box plates.

Installation plate 61

Installation plate to be used on vertical cable ladder installations for mounting of terminal boxes, contact breakers, etc.

Used on vertical cable ladder installations for mounting of terminal boxes, contact breakers etc. Mount with selftapping screw ST4.2 in the side profile.

Type	B mm
Installation plate 61-200	200
Installation plate 61-300	300
Installation plate 61-400	400
Installation plate 61-500	500
Installation plate 61-600	600

Earth clamp W79

The earth clamp is used when protective earthing of the junction box plate is required.

Earth clamps are designed for use when protective earthing of the mounting plate is required for mounting apparatuses as per relevant heavy current directives. The oblong holes in the junction box plate (mounting plate) permit movement of the earth clamp so that it always comes under the casing of the apparatus. If the apparatus's earth clamp is not approved for joining protective earth conductors, it must pass unbroken through the apparatus's earth clamp to the junction box earth clamp (see the fig.).

Junction box plate 35P

Junction box plate with holes, to be installed between rungs. Locked with appropriate locking tabs for each ladder. For junction boxes, electric light fittings, etc.

Mount junction box plates between the ladder rungs. On KHZSP, KHZSP+, KHZPS, KHZP and KHZPV attach junction box plates by bending the central tab into the rung perforation using a screwdriver or suchlike.

Mount junction box plates on KHZ and KHZV by bending the two outer tabs towards the round rung using a screwdriver or suchlike

Use and installation

Junction box plate 12xRJ45 Actassi S-one

Junction box plate delivered flat, to be bended on site.

Bend the ladder beam interface part 90° to the inside. Bend the optional fixation lips to the outside to easily position the junction box plate on the ladder beam.

Optional the junction box plate can be fixed to the ladder beam by using self drilling screws.

Riser 18

Riser piece to be fitted to the cable ladders by using Joint 21.

Join the cable ladders to Riser 18 using Joint 21.

Riser coupling 49

Coupling to be used as a self-supporting vertical coupling of cable ladders KHZV/KHZPV. Two screws M12 and nuts are needed.

Mount Riser coupling 49 to form a 90° branch on KHZV/KHZPV using 2 Screw sets M12. This provides a large radius for cables.

Riser coupling 20C

Coupling to be used as a self-supporting vertical coupling of cable ladders KHZP 20C range. Two screw sets M12 are needed.

Mount Riser coupling 20C to form a 90° branch on KHZP 20C using 2 Screw sets M12. This provides a large radius for cables.

Use and installation

90° bend 15, interior and exterior

Interior bend piece to be fitted to the cable ladders by using Joint 21, creating a 90° bend. Inner radius 268 mm.

Exterior bend piece to be fitted to the cable ladders by using Joint 21, creating a 90° bend.

Join cable ladders to 90° bend using Joint 21.

Type	R mm	A mm
Interior		
90° bend 15/150	268	547
90° bend 15/200	268	597
90° bend 15/300	268	697
90° bend 15/400	268	797
90° bend 15/500	268	897
90° bend 15/600	268	997

90° bend 15/1000	268	1397

Type	R mm	A mm
Exterior		
90° bend 15/150	554	703
90° bend 15/200	604	933
90° bend 15/300	704	1133
90° bend 15/400	804	1333
90° bend 15/500	904	1533
90° bend 15/600	1004	1733
90° bend 15/800	1204	2133
90° bend 15/1000	1404	2533

90° bend 55 interior

Interior bend piece to be fitted to cable ladders KHZV and KHZPV, creating a 90° horizontal bend.

For joining to KHZV and KHZPV, use Screw set M12

Type	A mm
90° bend 55/200	625
90° bend 55/300	725
90° bend 55/400	825
90° bend 55/500	925
90° bend 55/600	1025
90° bend 55/800	1225
90° bend 55/1000	1425

Use and installation

90° bend 20C, interior

Interior bend piece to be fitted to cable ladders KHZP 20C range, creating a 90° horizontal bend.

For joining to KHCP 20C/KHZV and KHZPV, use Screw set M12

Type	A mm
90° bend 20C/200	625
90° bend 20C/300	725
90° bend 20C/400	825
90° bend 20C/500	925
90° bend 20C/600	1025
90° bend 20C/800	1025
90° bend 20C/1000	1425

T-junction 16

T-junction piece to be fitted to the cable ladders by using Joint 21.

Join the cable ladders to T-junction 16 using Joint 21.

Type	A mm	L mm
T-junction 16/150	547	944
T-junction 16/200	597	997
T-junction 16/300	697	1097
T-junction 16/400	797	1197
T-junction 16/500	897	1297
T-junction 16/600	997	1397
T-junction 16/800	1197	1597
T-junction 16/1000	1397	1797

Use and installation

T-junction 56

T-junction piece to be fitted to the cable ladder KHZV or KHZPV by using screw set M12.

For joining to KHZV and KHZPV, use Screw set M12.

Type	A mm	L mm
T-junction 56/200	625	1050
T-junction 56/300	725	1150
T-junction 56/400	825	1250
T-junction 56/500	925	1350
T-junction 56/600	1025	1450
T-junction 56/800	1225	1650
T-junction 56/1000	1425	1850

T-junction 20C

T-junction piece to be fitted to the cable ladder KHZP 20C range by using screw set M12.

For joining to KHCP 20C/KHZV and KHZPV, use Screw set M12.

Type	A mm	L mm
T-junction 20C/200	625	1050
T-junction 20C/300	725	1150
T-junction 20C/400	825	1250
T-junction 20C/500	925	1350
T-junction 20C/600	1025	1450
T-junction 20C/800	1225	1650
T-junction 56/1000	1425	1850

P140039

X-junction 17

X-junction piece to be fitted to the cable ladders by using Joint 21.

Join the cable ladders to X-junction 17 using Joint 21.

Type	A mm
X-junction 17/150	547
X-junction 17/200	997
X-junction 17/300	1097
X-junction 17/400	1197
X-junction 17/500	1297
X-junction 17/600	1397
X-junction 17/800	1597
X-junction 17/1000	1797

P140040

S-bend 67

S-bend piece to be used as a transition between cable ladders mounted on different levels. Can be mounted both vertically and horizontally.

S-bend 67 can be mounted vertically or horizontally between cable ladders by using Dropper joint 32 or Joint 21.

Tele-conduit 36 with knock-out holes

Tele-conduit to be used where a separate tray is required for low-tension cables. Knock-out holes in the bottom of the channel permit the cables to pass through.

Type	B mm	C mm
Tele-conduit 36/50	42	50
Tele-conduit 36/100	92	100
Tele-conduit 36/200	192	200

Mount Tele-conduit 36 whenever a special channel is required for low tension lines.

Whenever you wish to make a hole to let a cable through, press the knock-out piece from below using a screwdriver or suchlike

In the event of special needs, a sealing sleeve 22.5 or corresponding may be mounted in the hole.

Attach Tele-conduit 36 onto KHZ and KHZV by tying with wire round rungs.

Attach Tele-conduit 36 to KHZSP, KHZSPZ+, KHZPS, KHZP and KHZPV using Screw set W34 through the rung perforations.

Dividing strip 39

Dividing strip to be used to separate low-voltage and high-voltage cables.

Type	H mm
Dividing strip 39/24	24
Dividing strip 39/55	55

Mount one or more Dividing strips 39 to separate low and high tension cables.

Attach Dividing strip 39 to KHZ and KHZV by lashing around the rungs.

Attach Dividing strip 39 to KHZSP, KHZSPZ+, KHZPS, KHZP and KHZPV using Screw set W34 through the rung perforations.

It is advisable to join dividing strips using Distance piece W39.

Distance piece W39

Distance piece to be used for the joining of Dividing strips 39.

Mount one or more Dividing strips 39 to separate low and high tension cables.

Cover W5

Cover to be used to protect the cable runs from dust, dirt, liquids, etc. Outdoors, it protects against rain and sun. Suitable for all cable ladders.

Type	Ladder width mm	B mm
Cover W5 - 150	150	151
Cover W5 - 200	200	201
Cover W5 - 300	300	301
Cover W5 - 400	400	401
Cover W5 - 500	500	501
Cover W5 - 600	600	601
Cover W5 - 800	800	801
Cover W5 - 1000	1000	1001

Mount covers to protect the cable routes from dust, waste, liquids, etc. Outdoors, covers protect against rain and sun. All Wibe cable ladders can be fitted with covers. Mount covers using Profile support piece 37 and Cover clamp.

Use and installation

Cover 90° bend

Cover to be used for 90° interior bends. To be installed with a Profile support piece 37, Cover clamp and Cover joint.

Type	Ladder width mm	B mm
90° bend - 150	150	151
90° bend - 200	200	201
90° bend - 300	300	301
90° bend - 400	400	401
90° bend - 500	500	501
90° bend - 600	600	601
90° bend - 800	800	801
90° bend - 1000	1000	1001

Stainless steel Type	Ladder width mm	B mm
90° bend - 150	150	147
90° bend - 200	200	197
90° bend - 300	300	297
90° bend - 400	400	397
90° bend - 500	500	497
90° bend - 600	600	597
90° bend - 800	800	797
90° bend - 1000	1000	997

Fasten cover to Profile support piece 37 using Cover clamp.

Mount with Profile support pieces 37, Cover clamps and Cover joints.

Cover T-junction

Cover to be used for T-junctions. To be installed with a Profile support piece 37, Cover clamp and Cover joint.

Type + ladder width	A mm	B mm	L mm	Type + ladder width Stainless steel	A mm	B mm	L mm
T-junction - 150	400	151	651	T-junction - 150	402	147	657
T-junction - 200	450	201	701	T-junction - 200	452	197	707
T-junction - 300	550	301	801	T-junction - 300	552	297	807
T-junction - 400	650	401	901	T-junction - 400	652	397	907
T-junction - 500	750	501	1001	T-junction - 500	752	497	1007
T-junction - 600	850	601	1101	T-junction - 600	852	597	1107
T-junction - 800	1050	801	1301	T-junction - 800	1052	797	1307
T-junction - 1000	1240	1001	1501	T-junction - 1000	1242	997	1507

Fasten cover to Profile support piece 37 using Cover clamp.

Mount with Profile support pieces 37, Cover clamps and Cover joints.

Use and installation

Profile support piece 37

Profile support piece to be used when installing covers. To be mounted on approximately every 0.5 m along both sides of the cable ladder. Used together with cover clamp for locking covers.

Mount Profile support piece 37 on the inside of the hexagonal section. Bend the tab towards the ladder section using a screwdriver as a lever.

Profile support piece 37 can be bent to fit the cover width.

Lock the cover on the Profile support piece 37 using Cover clamps.

Profile support pieces 37 can be mounted as cable supports. Mount the attachments at about 0.5 m centres on both sides of the ladder.

Cover joint

Cover joint to be inserted between covers.

Type	Ladder width mm	B mm
Cover joint 150	10	125
Cover joint 200	200	175
Cover joint 300	300	275
Cover joint 400	400	375
Cover joint 500	500	475
Cover joint 600	600	575

For width 800 or 1000 mm, use a combination of two smaller joints (e.g. 400+ 600 mm). Insert joints between covers.

Cover clamp

Cover clamps to be used when installing a cover on a Profile support piece 37.

Cover clamps are required for mounting covers on Profile support piece 37.

Protecting cover

Cover to be used to protect the cable runs against ice and snow. Suitable for all cable ladder widths 300 and 400 respectively.

Type	A mm
Protecting cover 300	300
Protecting cover 400	400

To be mounted on ladder KHZ with Intermediate connection bolt 29. When mounted on other ladders or when needed, drilling screw $\text{Æ} 4.2$ is used.

The covers can be mounted edge to edge.

The covers can be mounted with overlap. The asymmetric hole pattern can be used to achieve a good fit.

Cover 64

Cover to be used for vertically mounted cable ladders.

Cover 64 is to be mounted on the cable ladder with Wall bracket 11/25 or Wall bracket 11/75 and Screw set 22S. The covers are to be joined with Cover joints.

Type	B mm
Cover 64-150	151
Cover 64-200	201
Cover 64-300	301
Cover 64-400	401
Cover 64-500	501
Cover 64- 600	601
Cover 64- 800	801
Cover 64- 1000	1001

Cover plate 65

Cover plate to be used on vertical cable ladder installations as protection of cables near the floor. To be mounted in the side profile with self-tapping screw ST4.2.

Used on vertical cable ladder installations as protection of cables near the floor. Mounted in the side profile with self-tapping screw ST4.2.

Type	B mm
Cover 65-200	200
Cover 65-300	300
Cover 65-400	400
Cover 65-500	500
Cover 65- 600	600

Use and installation

Lighting bracket 200

Lighting bracket to be used for the installation of lighting fittings beneath cable ladders KHZV and KHZPV 200.

Mount Lighting bracket 200 for KHZV/KHZPV between the two lower tubes. If necessary, 5 mm dia. holes can be used for locking against the arch tube by means of blind rivets or sheet screws.

Angle plate 33/2

Angle plate 33/1

Angle plate 33/1 and 33/2

Angle plate to be used together with 90° horizontal T-junctions. Recommended for all cable ladders.

Angle plate 33/1

Angle plate 33/2

Angle plates are always recommended at 90° horizontal junctions.

To lock Angle plate 33/2, fit Profile clamp 42.

Wall bracket HT-14

Bracket for wall installation

Wall bracket HT-14 is installed on wall with Expansion bolt or concrete screw.

Use and installation

Carrying bracket HT-31

Carrying bracket to be used for ceiling installations.
To be installed with Expansion bolt or concrete screw.

Carrying bracket HT-31 is installed on ceiling beam with Expansion bolt or concrete screw.

Carrying bracket HT-152

Carrying bracket to be used for easy I-beam installations.

Carrying bracket is easily installed on I-beam.

Carrying bracket HT-33/34

Carrying bracket to be used for ceiling installations.
To be installed with Expansion bolt or concrete screw.

Type	A mm
HT-33	14
HT-34	38

Carrying bracket is installed in ceiling with Expansion bolt or concrete screw.

Carrying sling HT-51

Carrying slings for cables.

Carrying sling with space for 6 cables max. diam. 16 mm.

Use and installation

End bracket HT-11

Used for assembling pendant/fixing rails to frames for switching cabinets and electrical control centres. Also suitable for assembling pendant rails for crossing cable runs. Also used as End Bracket for ceiling beam installation.

End bracket HT-11 is installed on ceiling beam with Expansion bolt or concrete screw.

End bracket HT-11 permits mounting of crossing cable ladders in various planes on the same vertical piece.

Cantilever arm 50 may, using End bracket HT-11, be mounted at 90° to the vertical piece. Only for lightweight mounting of data cable type or suchlike.

The HT-11 can be used when mounting together 2 Pendant/Fixing rail 24/34, for example when assembling a stand.

The HT-11 can be used when mounting together 2 Pendant/Fixing rail 24/48 with the opening towards the attachment, for example when assembling a stand.

The HT-11 can be used when mounting together 2 Pendant/Fixing rail 24/48, with the rear towards the attachment.

Tightening loop HT

Tightening loop to be installed at the ends of steel wires.

Type	A mm	C mm	D mm
Tightening loop HT-611	125	100	22
Tightening loop HT-621	270	100	50
Tightening loop HT-631	400	150	50

Tightening loop is installed in End bracket HT-11 for installation on ceiling beam.

Tightening loop is installed in Angle bracket 5L for installation in ceiling.

Tightening loop is installed in Wall bracket HT-14 for installation on wall.

Pipe HT-68 and HTR-68

Pipe for easy locking of wires. Ø 15 mm Length 25 mm.

The steel cable is easily locked with the pipe.

Use and installation

Type	Diam. mm	Breaking load kg
HT-2309	5.00	700
HT-2311	6.15	970
HTR-2322	2.50	450
HTR-2323	3.00	700
HTR-2324	4.00	1200

Steel wire

Steel wire to be installed as carrier of one or more cables.

Steel wire installed in ceiling with beams.

Steel wire installed in ceiling.

Reducer 31

Reducer to be used for transition joining from a wide to a narrower cable ladder.

Type	A mm
Reducer 31/100	100
Reducer 31/200	200
Reducer 31/300	300
Reducer 31/400	400

Reducer to be used for transition joining from a wide to a narrower cable ladder.

May also be used at centred transition joining

Reducer 20C

Reducer to be used for transition joining from a wide to a narrower cable ladder.

P150440

Type	A mm
Reducer 20C/100	100
Reducer 20C/200	200

May also be used at centred transition joining

Reducer to be used for transition joining from a wide to a narrower cable ladder.

Use and installation

Round bar fixing for ceilings

Round bar fixing to be used for mounting in underground cavities and tunnels.

Round bar fixing for ceilings is mounted on pendant/fixing rail 24/48 with screw set 22S. Support bracket 3 is mounted directly on the fixing with Screw set 22S.

Using round bar fixing for ceilings, pendant/fixing rail 24/48 and screw set 22S it is possible to make a vertical piece that can be installed at an angle of up to 10°.

Round bar fixing for walls

Round bar fixing to be used for mounting in underground cavities and tunnels.

Round bar fixing for walls mounted on Pendant/fixing rail 24/20F with T-bolt 26U.

Round bar fixing for floors

Round bar fixing to be used for mounting in underground cavities and tunnels.

Round bar fixing for floors mounted on Pendant/fixing rail 24/48 with Screw set 22S.

Round bar fixing for floors mounted on Pendant/fixing rail 24/48 with T-bolt 26U.

Clamp set M6

Clamp set to be used for the installation of Support bracket 3 directly on a roof bolt. The set includes two clamps and four locking nuts. M6-25 must be used for Support bracket 3 in hot-dip and pre-galvanized surface finish, whereas M6-20 must be used for Support bracket 3 in stainless steel and Installation plate 60 in all surface treatments.

Type	Ø
M6-25	29
M6-20	24

For installation of Support bracket 3 directly on ribbed bar 16-25 or fully threaded bar M16-M27.

Max. symmetrical loading 300 kg. Make sure the clamps grip the bar in a correct manner.

Use and installation

Cable clamp ARX

Cable clamp for fastening of cable on Pendant/Fixing rail 24/48 and on cable ladders KHZ, KHZV, KHZSP, KHZSPZ+, KHZSP85, KHZPS, KHZP and KHZPV, in combination with Insert piece EM.

Cable clamp ARX1

Type	For cable mm
CABLE CLAMP ARX1-12 Z+	- 12
CABLE CLAMP ARX1-16 Z+	13 - 16
CABLE CLAMP ARX1-22 Z+	17 - 22
CABLE CLAMP ARX1-28 Z+	23 - 28
CABLE CLAMP ARX1-36 Z+	29 - 36
CABLE CLAMP ARX1-44 Z+	37 - 44
CABLE CLAMP ARX1-52 Z+	45 - 52
CABLE CLAMP ARX1-60 Z+	53 - 60
CABLE CLAMP ARX1-70 Z+	61 - 70

Cable clamp ARX2

Type	For cable mm
CABLE CLAMP ARX2-12 Z+	- 12
CABLE CLAMP ARX2-16 Z+	13 - 16
CABLE CLAMP ARX2-22 Z+	17 - 22
CABLE CLAMP ARX2-28 Z+	23 - 28
CABLE CLAMP ARX2-36 Z+	29 - 36
CABLE CLAMP ARX2-44 Z+	37 - 44
CABLE CLAMP ARX2-52 Z+	45 - 52
CABLE CLAMP ARX2-60 Z+	53 - 60

Use Cable clamp ARX to attach cables to Pendant/Fixing rail 24/48. Use Insert piece EM.

Mounting rail 40 with Cable clamp ARX.

Use Cable clamp ARX to attach cables to cable ladders KHZSP, KHZSPZ+, KHZPS, KHZPV and KHZP. Use Insert piece EM.

In order to avoid torsion of the rung, cable clamps can be mounted opposite each other on the rung.

Cable clamp ARX is used for fastening cables on the cable ladders KHZ and KHZV. Insert piece EM must be installed.

Insert piece EM

Insert piece to be used in order to prevent pressure on the cable. The insert piece is placed between the cable and the rung from the same side where the clamp has been fastened to the rung.

Insert pieces increase the contact area of the cables.

Type	For cable mm
EM - 12	- 12
EM - 16	13 - 16
EM - 22	17 - 22
EM - 28	23 - 28
EM - 36	29 - 36
EM - 44	37 - 44
EM - 52	45 - 52
EM - 60	53 - 60
EM - 70	61 - 70

Lashing wire

Lashing wire to be used for lashing of wires on cable ladders.

Type		Diam mm	Breaking load kg
HTR - 2303	Lashing wire, stainless steel, white PVC	1.25	92
HTR - 2313	Lashing wire, stainless steel, black PVC	1.25	92
HT - 2304	Lashing wire, white PVC	1.5	25
HT - 2314	Lashing wire, black PVC	1.5	25

Cables are easily installed by lashing around the rungs of KHZ and KHZV.

Cables are easily installed by lashing through the perforations of the rungs or around the rungs of KHZSP, KHZSPZ+, KHZPS, KHZP and KHZPV.

Cables are easily installed on KHZSP, KHZSPZ+, KHZPS, KHZP and KHZPV by lashing in such a way that the lashing wire is pinched around the rung as shown.

Dividing strips and tele- conduits are attached to the ladder by lashing around the rungs of KHZ and KHZV

Use and installation

Cable clamp ER

Cable clamp for the installation of cables on cable ladders with round or perforated rungs.

Cable clamp ER

Oval rung adaptor

Type	For cable mm	A mm	B mm
Cable clamp ER	23 - 28	80	74
Cable clamp ER	27 - 32	82	81
Cable clamp ER	30 - 35	82	88
Cable clamp ER	33 - 38	85	94
Cable clamp ER	36 - 42	113	101
Cable clamp ER	40 - 46	115	108
Cable clamp ER	44 - 50	117	115
Cable clamp ER	48 - 55	120	129
Cable clamp ER	51 - 58	121	130
Cable clamp ER	55 - 62	156	138
Cable clamp ER	59 - 66	158	146
Cable clamp ER	63 - 70	160	150
Cable clamp ER	67 - 74	163	161
Cable clamp ER	71 - 78	165	168
Cable clamp ER	74 - 82	167	176
Cable clamp ER	77 - 85	169	181

Tested at British short-circuit testing station.
Test report no. BS/F 1265

- Wibe cable ladder KHZ-600, KHZP-300 and KHZP-600. Cable clamp ER mounted on every rung.
- Wibe cable ladder KHZ-300. Cable clamp ER mounted on every other rung.

Condition after test

400 volt 58 kA symmetrical current (Peak 140 kA) during 0.1 second:

- All clamps remained secure
- Some slight distortion of the ladder rungs
- The cables were splayed out between the clamps but otherwise in good order.

Test report no. BS/F 1268

- Wibe cable ladder KHZ-600 and KHZP-600. Cable clamp ER mounted on every other rung

Condition after test

352 volt 64 kA symmetrical current (Peak 140 kA) during 0.1 second:

- All clamps remained secure
- There was distortion of a number of the ladder rungs
- The cables were splayed out between the clamps but otherwise in good order.

Remove the bottom plate of the clamp and mount it with Oval rung adaptor on cable ladders with round rungs - KHZ and KHZV.

Mount the cables.

Remove the bottom plate of the clamp and mount it with 2 screw sets 74S on cable ladders with perforated rungs - KHZP, KHZPS, KHZSP, KHZSP+ and KHZPV.

Lock the clamp with the locking nut. Turn the nut to max. 4-5 Nm. The rubber lining must touch the cables but not so tight that the cables will be deformed

Remove the locking nut. Open the clamp.

Oval rung adaptor, screw set included, to be used when mounting Cable clamp ER on oval rungs on the KHZ range.

Use and installation

Mounting rail WMS25L

Mounting rail to be used for installation directly on wall for lashing of cables.

Mounting of cables with lashing wire, strips etc. The mounting rail installed directly onto wall.

Profile protection 28P

Profile protection to be used to increase the contact surface of the cables, when pulled over the side profile of the ladder.

Mount Profile protection 28P in order to increase the contact surface of the cable, when pulled over the side profile of the ladder. Cut when required.

Can be cut in suitable lengths and equipped with an information label. Easy to mount on the ladder side profile.

Use and installation

Marking plate 93

Marking plates are part of a colour marking system that is easy to use when you want to mark out the type of cable that is placed on the cable ladder

The Marking plate can be bent around the side profile on all Wibe cable ladders.

End plug 28 and 28i

End plug to be mounted on ladder ends for sealing or protection.

End plug 28

End plug 28i

Mount End plug 28 in ladder ends as protection.

Mount End plug 28i inside the ladder ends for se-aling. Joining with Joint 19 or 21 can be made with End plug 28i left in the ladders ends.

End plug 28C, D, E, F and J

End plug to be mounted on pendant ends to provide protection against personal injury and to make the ends of the profiles more conspicuous.

End plug **28C** fits Vertical piece 2 and Pendant/Fixing rail 24/34.
End plug **28E** fits Vertical piece 2F and Pendant/Fixing rail 24/48.

End plug **28D** fits Vertical piece 20 and Pendant/Fixing rail 24/20.
End plug **28F** fits Vertical piece 20FS and Pendant/Fixing rail 24/20FS.
End plug **28J** for Vertical piece 20F and Pendant/Fixing rail 24/20F

Cross member plug 27

Cross member plug to be installed at the ends of the rungs of KHZ and KHZV. Used in premises with a high corrosion risk.

Mount Cross member plug 27 in KHZ and KHZV rung tube ends in pre- mises with high relative humidity where the risk of corrosion is high

Use and installation

T-bolt 26U

Easy to fit into the fixing rail. It is made to stick which makes it easier to mount and attach compared to a spring nut. It stays in place by itself even before it is fixed with the nut. To be used for the mounting of Cantilever arm 50 on Pendant/Fixing rail 24/48 and all vertical pieces except Vertical piece 2.

Type	L mm	A mm
M8	34	23
M10	34	23
M10	44	33
M10	54	43

Max permitted extraction force

T-bolt 26U M8/M10 + P/F-rail 24/48 + Washer 8.4x19x1.5

T-bolt 26U M8 + P/F-rail 24/48 + Washer 9x35x2

T-bolt 26U M10 + P/F-rail 24/48 + Washer 9x35x2

Screw set M12

Screw set to be used for all joints with cable ladders KHZV and KHZPV.

For joining ladders.

For joints with Riser coupling 49.

For joints with 90° bend 55 and T-junctions 56.

Use and installation

Screw set 2S

Screw set to be used for fastening of Support bracket 3 on Pendant/fixing rail 24/20F and Angle bracket 5L to the opening on Pendant rail 24/34 and 24/48. Set including screw MVBF 8x40 and nut M6MF8.

Screw set 20S

Screw set to be used for installation of Support bracket 3 on Pendant/fixing rail 24/20 and Vertical piece 20, Angle bracket 5L to the opening on Pendant rail 24/48 and 24/20. Set including screw MVBF 8x60 and nut M6MF8.

Screw set 22S

Screw set to be used for installation of Support bracket 3 on Vertical piece 2 and 2F, Support bracket 3 and Ceiling bracket 5 on Pendant/fixing rails 24/34 and 24/48, Angle bracket 5L against the back of Pendant/fixing rails, Pendant/fixing rails back to back. Set including screw MVBF 8x16 and nut M6MF8.

Screw set W34

Screw set to be used for the fastening of dividing strips on cable ladders KHZSP, KHZSPZ+, KHZPS and KHZPV. Set including screw MSCS 6x12 and nut M6MF 6.

Screw set W37

Screw set including bolt MVBF 8x35 and nut M6MF 8, to be used for the installation of Support bracket 3 on Vertical piece 20F.

Screw set M10 x 20

Screw to be used with Spring nut M10 for the installation of Cantilever arm 50 on Pendant/fixing rail 24/48.

Spring nut M8/M10

Spring nut to be used for fastening of accessories (control panels, etc.) on Pendant/fixing rail 24/48.

Back nut M8

Back nut to be used for fastening of vertical pieces, etc., in the rungs of cable ladders KHZSP, KHZSPZ+, KHZP, KHZPS and KHZPV.

Mounting with Threaded rod M8 and Backnut M8 in the cable ladder rungs.

Pendants etc. are mounted with Bolt M8 and Back nut M8 in the rungs.

Flange nut B43 M8, M10

Used for joining of Threaded rod W76 M8 and M10.

Thread lock B50 M8, M10

Used for joining of Threaded rod W76 M8 and M10.

Intermediate connection bolt 29

Intermediate connection bolt to be used at the transition from a broad to a narrower cable ladder KHZ.

Type	Bolt diam x length mm
Intermediate connection bolt 29/200	M10 x 235
Intermediate connection bolt 29/300	M10 x 335
Intermediate connection bolt 29/400	M10 x 435
Intermediate connection bolt 29/500	M10 x 535
Intermediate connection bolt 29/600	M10 x 635

Intermediate connection bolts are used for chan- ging from a broad to a narrower ladder. The broader ladder's last rung is cut to permit the na- rrower ladder to fit in. The intermediate connection bolt is mounted through the rungs of the KHZ ladder.

Intermediate connection bolts can also be used for transition from one wide ladder to two narrower ones.

Intermediate connection bolt also permits forma- tion of angles.

To be mounted on ladder KHZ with Intermediate connection bolt 29.

Beam clamp 5BK

Beam clamp to be used for the installation of Vertical pieces 2, 2F or 20 on I-beams.

Type	A mm
Beam clamp 5BK-10, for flange thickness max 13 mm	30
Beam clamp 5BK-30, for flange thickness max 14-30 mm	50

On ceiling beams, mount Vertical piece 2, 2F or 20 using 2 Beam clamps 5BK, Pendant/Fixing rail 24/48 and Screw set 22S. For Beam clamp 5BK-10, use T-bolt 26U/40. For Beam clamp 5BK-30, use T-bolt 26U/50.

Alternatively, a Pendant/Fixing rail 24/20 may be used. This will require 4 T-bolts.

Hot dip galv.

AISI 316L

Hook 8

Hook to be used for the installation of cables beneath Support bracket 3. Can also be installed in perforated rungs.

Hook 8 mounted beneath Support bracket 3 for installation of cables.

Hook 8 installed in a perforated rung.

Use and installation

Cable roller S

Cable roller used to facilitate the pulling of cables and lines. Easily installed on all Wibe cable ladders except the high-sided WHS ladders (outer mounting hole). Also suitable for external/internal profiles of all 90° bends, T-junctions, X-junctions and risers (inner mounting hole). With a height adjustment of 45 mm to leave room for cables to pass under the roller.

Load

Permitted loading F_1 = 100 kg (KHZ, KHZP, KHZV) 35 kg (KHZSP)

Permitted loading F_2 = 125 kg (KHZ, KHZP, KHZV) 35 kg (KHZSP)

Permitted loading F_3 = 100 kg (KHZ, KHZP, KHZV) 35 kg (KHZSP)

For fitting on 90°,
T- and Xjunctions,
use the inner
mounting hole.

For mounting on
ladders,
use the outer
mounting hole.

Use and installation

Cable roller 38 Rig'n roll

Cable roller used for mounting on Wibe cable ladders with belonging junctions and branches.

**Load**

Permitted loading $F_1 = 20$ kg (KHZ, KHZP, KHZV, KHZSP)
 Permitted loading $F_2 = 50$ kg (KHZ, KHZP, KHZV, KHZSP)
 Permitted loading $F_3 = 50$ kg (KHZ, KHZP, KHZV)
 25 kg (KHZSP)

Cable roller 38 is to be mounted on the cable ladder profile.

Use a screw driver when dismantling the cable roller.

Open the cable roller by pressing the locking button and turn the loop aside.

The loop has rollers which make cable pulling over bends and junctions very easy.

Appropriate tightening torque

Part	Application	Tightening torque (Nm)
T-Bolt 26U+2F+Ca50i	Support system	M8: 15/M10: 25
Screw set 2S+Pendant bar1+2F	Support system, front side of 2F	M8: 15/M10: 25
Screw set 2S+Pendant bar1+2F	Support system, back side of 2F	M8: 15/M10: 25
Screw set 20S+2F+(2)Ca50i	Balance application	M8: 15/M10: 25
Screw set 22S+2F+Ca50i	Support system, back side of 2F	M8: 15/M10: 25
2FJ+24/48	Extension application	M8: 15/M10: 25
